By Bernard Gwertzman New York Times Service NEW YORK - South Africa's apartheid system is "doomed," according to Secretary of State George P. Shultz, and efforts must be made to reach political compro-mise before a violent revolution overthrows the white minority gov-

Otherwise, Mr. Shiltz warned Wednesday night, "the black ma-jority might likely wind up ex-

South Africa restricts the remission of profits or income to non-Page 11.

changing one set of oppressors for another and, yes, could be worse

In a speech to the National Committee on American Foreign Policy, Mr. Shultz said South Africa's current system of racial separation

The only alternative, he said, "to a radical, violent outcome is a political accommodation now, before it

ical accommodation now, before it is too late."

In an interview Thursday with The New York Times, Mr. Shultz urged that the South African government "signal" its willingness to engage in the search for a political compromise with the black majority by freeing Nelson Mandela, the prominent black political prisoner, and agreeing to negotiations with Shifts to Back and agreeing to negotiations with him and the outlawed African Na-

tional Congress.
"That would be a huge event for the South African government to do," Mr. Shultz said, "and that

would be traumatic for them." Mr. Shultz said there were many They said Wednesday that possible ways for the South African Washington now accepted the Lar-authorities to indicate their desire authorities to indicate their desire for a peaceful transition.

in American contention that "It could be in the form of releasgrowth-oriented policies would ening people from prison and saying that they are willing to deal with than the austerity programs de-manded until now by the Internathem, as in the case of Mandela,"

We have said that Mandela should be released and that they should deal with the African National Congress," he said. Mr. Mandela, imprisoned since 1962, was the president of the congress.

time endorsed the principle that the In his speech Wednesday, titled governments of leading Western "Moralisy and Realism in Foreign Policy," Mr. Shulez said that events nations should play a direct role in in Iran and Nicaragua showed the This is the first new approach that we've seen since the debt crisis fallacy of pushing "our nondemocratic allies too far and too fast" to began," a Brazilian official said.

change their system. "It's still too early to know whether The fall of a strategically locatit will be radical enough, but it Evidence of this came Tuesday when the Treasury secretary, James A. Baker 3d, and Paul A. Volcker. globally," he said.

in his speech, Mr. Shultz said the moral and strategic reasons," deal-

on the administration's plans and to urge cooperation. Until now, Washington has regarded the IMF "We have friends and allies who as the main intermediary between do not always live up to our standebtor nations and their commerdards of freedom and democratic government," he said, "yet we can-not abandon them." Banking sources said the United

The United States' adversaries "are the worst offenders of the principles we cherish," he said. But the nuclear age gives the country no other choice but to seek solutions

by political means." He said the nation must also find a way to respond to terrorism "that is consistent with our ideals as a

free and law-abiding society."
In discussing Nicaragua, Mr. Shultz sought to distinguish between the Reagan administration's distaste for the Sandinist government's ideology and larger strategic

concerns. "We must oppose the Nicaraguan dictators not simply because they are Communists," he said, but because they are Communists who serve the interests of the Soviet Union and its Cuban client, and who threaten peace in this hemi-

Shuttle Goes Up With Secret Satellites

CAPE CANAVERAL, Florida (AP) - Atlantis, the fourth and last U.S. space shuttle of the current series, was launched into orbit Thorsday on a secret voyage, carrying a crew of five and two \$100-million military communications satellites. The flight is expected to last four or five days. Nine minutes after the Atlantis liftoff at 11:15 A.M., Mission Contro Center in Houston reported that the spacecraft was in a secure orbit. Forty minutes later, Mission Control reported, "All systems on board are

operating and the mission is proceeding as planned."

The exact launch time had not been announced publicly until just nine minutes before liftoff. Defense Department officials had said that the secrecy would make it more difficult for Soviet satellites and spy ships offshore to monitor the flight.

The Atlantis flight is the second specifically Defense Department space L As on me first one, in Ja has leaked to news organizations. Reliable sources have reported the astronauts will deploy two Defense Satellite Communications System satellites designed so an enemy cannot jam their communications and they could be used by the president to send emergency instructions to nuclear forces around the globe.

#### Correction

A Reuters report from Port Elizabeth, South Africa, in some editions of the International Herald Tribune of Oct. 1, incorrectly quoted President Pieter W. Botha as saying that his government rejected the idea of votes for everyone in the country. In his speech, the president rejected the idea of a one-man, one-vote democracy in a unitary state, but he said that he and his party "are committed to the principle of a united South Africa, one citizenship and a universal franchise."

Workers search debris in an effort to rescue 9-year-old Luis Ramon Nafarrate.

### Workers Are Digging Toward Boy Trapped 2 Weeks in Mexican Home

MEXICO CITY - Rescue workers dug with their bare hands Thursday to within a few feet of a 9-year-old boy trapped alive for two weeks under the rubble of the Mexican earthquake.

They said they hoped to reach Luis Ramon Nafarrate soon. The boy has been lying in the ruins of his home in the city's central district since the building collapsed in the Sept. 19 earthquake. The workers said they were not sure the boy would be found alive because he was weakening

rapidly from thirst, hunger and cold.

His father, Mauricio Nafarrate, said two policemen had heard noises coming from the ruins last weekend and alerted rescue workers, who contacted Luis with special sensory devices. He was the first trapped person to be found alive

in a week, renewing hopes that others might still survive in debris passed over by rescue teams.

Foreign rescue experts aided by sniffing dogs had focused their efforts on big buildings, particu
collapse in a cloud of dust.

larly two hospitals, a school and a high-rise apart-ment block. Most of the foreign rescue teams left Mexico earlier this week.

The experts and volunteers dug out more than 1,000 survivors in the first week after the earthquake, but thousands more are known to be misswards at the two hospitals.

The diggers working toward Luis said they believed that his 57-year-old uncle, Luis Maldonado, might also be alive.

The rescue workers who contacted the boy asked him questions, instructing him to tap once for "yes" and twice for "no." He told rescuers that he was a child, that he was alone and that he could move. He said he was cold, but not badly hurt.

Luis's father said he was out shopping when the

### **Emergency Proposal** To End Budget Deficits Gains in U.S. Senate By Helen Dewar

WASHINGTON - An emer-

gency proposal to erase budget defcits and force Congress and the White House to create a balanced budget within five years gathered steam Thursday in the U.S. Senate.

Some senators predicted that legislation raising the federal debt ceiling to \$2 trillion could not pass without it. That legislation is necessary to keep the government functioning after Monday, when its cash balances are expected to run

About 40 senators, including several Democrats, joined Wednesday as co-sponsors of a Republican-drafted amendment to reduce the deficit from \$180 billion to zero by threatening mandatory acrossthe-board spending cuts if annual targets for deficit reduction were not met.

They plan to push it as an amendment to the debt measure, which Treasury Secretary James A. Baker 3d has said must be passed by Monday so the government can keep borrowing to pay its bills.

By Monday, the government's cash balances will be "virtually exhausted" and "the situation will deteriorate sharply thereafter," Mr. Baker said in a letter to the Senate

majority leader, Robert J. Dole of The surge in support for the deficit-reduction measure, drafted by Senators Warren B. Rudman of New Hampshire and Phil Gramm of Texas, both Republicans,

prompted moves by the Democratic leadership in both houses to come up with counterproposals. In the Republican-controlled Senate, Minority Leader Robert C. Byrd of West Virginia was working with Senator Lawton Chiles Florida, the ranking Democrat on

creases as well as spending cuts. In the House, where the Democrats are in control, Speaker Thomas P. O'Neill Jr. of Massachusetts and other Democratic leaders were exploring strategy for dealing with the debt bill if, as they expect, the Senate sends it back to the House with a deficit-reduction rider.

"Almost any balanced-budget proposal could pass the House" unless a more attractive option is proposed, commented a House Democratic aide, who said a task force was likely to be appointed to draft an alternative deficit-cutting plan.

Under the Gramm-Rudman proposal, the president and Congress would be required to keep their budgets within limits phasing the deficit down to zero by fiscal 1991. If the limit were exceeded by more than 5 percent, the president would be required to cut equally from entitlement programs and discretionary spending, including mili-

The threat of such cuts is expectown deficit reductions, possibly in-cluding tax increases as well as spending reductions. Some backers of the proposal indicated it would improve chances for tax increases.

Most professionals in the field of compulsive gambling are not seeking the abolition of state lotteries. their proposal, Senators believed in had enough votes to pass the Sen-ate and contended that the debt

Robert J. Dole

measure could not pass without it, a view shared by many others.

With mounting public concern over deficits, reinforced by the only five years after indebtedness hit the SI-trillion mark, many lawmakers are reluctant to raise the ceiling without a demonstration of intent to control deficits.

The House, in effect, approved the increase in the debt ceiling when it passed a budget blueprint Aug. I. But the Senate operating under different rules, must take a

Senator Dole, pressing for speedy consideration of the mea-sure, is calling Monday the "drop-dead date" when the government's borrowing authority would be ex-

1972."

across the United States:

• Glenwood Herbert Stout, 55,

was recently released from federal

and New Jersey state lotteries.

Yes, only 80,000 tickets participate in the 121st Austrian Lottery, bringing YOU closer to BIG WINS like these: 1st Prize: US \$ 624,000.00 2nd Prize: US \$ 312,000.00

3rd Prize: \$ 260,000.00 2 Prizes of \$ 156,000.00 2 Prizes of \$ 104,000.00 31 Prizes of \$ 52,000.00 35 Prizes of \$ 26,000.00 PLUS 44,825 Other Cash Prizes up to \$ 15,600.00

Total Prize Money: \$ 22,089,680.00 Your winning chances are the best worldwide, since one out of

every two tickets wins at least the cost of the ticket.

• All wimings paid out tax-free in any currency, anywhere.

• For your protection, the Austrian Lottery is under strict govern-Make a date with luck! Write today, using coupon, for brochure and ticket application form

## A Dampened Nigeria Observes Its 25th

By Edward Gargan New York Times Service

LAGOS — Twenty-five years ago the Oba, or tribal chief, of Lagos paid rainmakers \$2,800 to ensure that a downpour would not spoil a ceremony in which the Brit-ish flag would be lowered for the last time and the green-and-white banner of the new country raised in

On Tuesday, as Nigeria's latest military ruler stood at attention watching army and navy units march by in Tafawa Balewa Stadium, it poured. The country was observing its 25th anniversary of

"In these economic hard times, we can't afford such things" as rain control, said a newly appointed government official. He was squeezed under a canopy, a frail refuge from the sheets of rain that lashed the concrete stadium. After two civilian governments and six military coups, the last in August, Nigeria has fallen on hard

times. The promise of indepen-dence that surged across Africa a quarter of a century ago — a promquarter of a century ago — a pron-ise of economic opportunity, uni-versal education and political free-dom—has been largely unfulfilled. In a televised address Tuesday, Nigeria's military leader, Major General Ibrahim Babangida, painted a bleak portrait of the country's

course since independence. Nigeria, he said, has undergone "social upheaval, political instabil-ity, religious intolerance and economic hardship." Then General Babangida

nounced a 15-month national state of economic emergency. He also declared a ban on imports of rice and corn and an end to the practice of trading oil for consumer goods. He said Nigeria needed health care that is not only for the rich,

untry's crumbling roads.
"All of us," he said, "must make hard choices involving great difficulties and requiring sacrifices balanced baskets of empty bottles from everyone and every sector, on their heads. Women wrapped in including the armed forces." General Babangida dropped few hints about when Nigeria would

## PERSONAL INVEST

# The Fall Survey International

With the boom in offshore investment products, the fund investor has no lack of choice.

But such variety has made the task of matching funds with investment goals more

daunting than ever. On October 14, Personal Investing tries to bring some order to the chaos with the first of what will be twice-a-year surveys of international funds. The leaders and laggards will be listed in

every major category of fund. And the experts will offer some hints on the theory and practice of fund investing. It adds up to must reading and a ready reference for the serious investor. Don't miss it.

"Surviving in a competitive environment", will be the theme of the sixth International Herald Tribune/Cil Daily Conference on "Oil and Money in the Eighties". The program, designed for senior executives in energy and related fields, will address the key issues affecting the current energy situation and assess future trends and strategies. H.E. Professor Dr. Subroto, Minister of Mines and Energy, Indonesia and President of the OPEC conference, and John S. Herrington, U.S. Energy Secretary, will head a distinguished group of speakers from Europe, the Middle East, Latin America and the United States.

#### **Victims of Free Trade**

A mighty urge has been building in the Congress to do something, almost anything, to show concern about the huge U.S. trade deficits. Even senators and congressmen with unswerving commitments to the principle of free trade are feeling the need to demonstrate sensitivity to the domestic troubles caused by foreign competition. A likely vehicle for that concern is a proposal by Senator William Roth of Delaware, and others, to extend and expand the Trade Adjustment Assistance program.

The Roth proposal would impose a small "adjustment fee" on all imports to pay for extended unemployment benefits and retraining for workers who lose jobs to foreign competition. It has an advantage over other pro-posals aimed at helping U.S. workers: strong bipartisan backing, especially within the powerful Senate Finance Committee, and inclusion in the budget reconciliation measure that the Senate is expected to take up soon.

The plan also has intuitive appeal. Open trade is surely good for the United States and other countries in the long run, but in the short run the costs of adjustment fall heavily on certain people and localities. Why not make the people who profit from importing goods into the United States help ease the resulting hardships? Senator Roth and the bill's cosponsors point out that the needed levy on imports would be so small (probably only onetenth of I percent of import value) that the United States's trading partners would proba-

bly accept the required change in trading rules. The Reagan administration, however, has stoutly opposed other import surcharges and, while it has not yet registered opposition to this one, may well be reluctant to embrace it. The administration has consistently opposed the whole concept of earmarking programs for workers hurt by trade on the sensible ground that such workers have no larger claim to public help than workers displaced by technological change, faulty management, high inter-est rates or domestic competition.

It also turns out to be very hard to pinpoint eligible workers; a study of earlier trade adjustment programs found that workers given help because their jobs had been permanently lost to foreign competition were much more likely to be recalled to those same jobs than were workers who were not helped.

A better strategy might build upon the worker adjustment programs already being funded by the Labor Department. While these programs are still quite new and generally lack money for extensive retraining or worker stipends, they have encouraged considerable innovation by states and involvement by private companies. Unfortunately, even as the Congress considers voting money for a new dis-placed-worker program under the heading of "trade," it is also in the process of approving a huge cut in funding for the existing programs. That does not make sense.

### The Russians This Time

prisoner in Lebanon even as the report came that a fourth, a diplomat, had been executed by an Islamic fundamentalist group fighting in Tripoli against Lebanese elements backed by Syria and, through Syria, the Soviet Union. Few people, we surmise, are going to be able to deplore the murder without wondering wheth-er it might not be therapeutic for the Kremlin to get a taste of the medicine that it has long been prescribing for others through its various approaches to encouraging international ter-rorism. But this in itself is not an adequate, let

alone an attractive, reaction. This appears to be the first time Soviet citizens have been taken hostage and harmed in the charnel house of Lebanon. As a result, there is much curiosity about what the Kremlin may do. One theory has been that terrorists have hesitated to hit Soviet targets for fear of an immediate and crushing response. Now we will see whether Moscow moves to protect, remove or avenge its people, and whether it slackens or keeps up or even increases its support for its Lebanese friends in the field. These are important questions bearing on the whole Soviet role in the Middle East.

It is painful but necessary to note that in somewhat analogous circumstances of threat

Three Soviet citizens were still being held to its Lebanese presence, the United States abandoned its role as a would-be patron of the country's integrity and unity. In a little-noted sequel, the Soviet Union then deliberately moved into some part of that same role, principally by backing Syria, which sees itself as the

single legitimate overseer of Lebanon. Syria has been conducting a hard policy of enforcing order of a sort in Tripoli and of otherwise trying to assert control in Lebanon. The United States is not pleased with the means, but in the absence of any other feasible way to stop the bloodletting and disintegration, Washington has quietly endorsed the Syrian policy. It has done so notwithstanding Syria's own readiness to sponsor and condone terrorism, including it is believed, terrorism directed at Americans. Washington thus has acquiesced to the Soviet supporting role.

This leaves the United States in a strange position on the latest hostage-taking. Even as it takes a consistent position against terrorism. Washington cannot fail to hope against hope that Moscow will review its cynical support of terrorism. Yet the United States finds itself forced to acknowledge the job that the Soviet Union is performing in Lebanon, one that the Reagan administration largely yielded.

- THE WASHINGTON POST.

#### Panama Is Off the List

Strike Panama from the list of restored Latin American democracies that the United States has been celebrating.

In a democracy, the military is not expected regularly to depose or impose presidents, as the Panamanian National Guard has done five times in three years. In a democracy, civilian critics of military power are not supposed to be decapitated, with the apparent collusion of the military, as happened two weeks ago to Dr. Hugo Spadafora.

In a democracy, journalists are not normally threatened by military intelligence operatives, and United States ambassadors do not feel obliged to warn opposition newspapers that they risk being closed down unless they mute their criticism — as Ambassador Everett Briggs felt obliged this week to warn reporters and editors of the daily La Prensa.

If what is happening in Panama is democracy. Nicaragua can fairly claim it is being subjected to a double standard. The right name for the Panamanian regime is dictatorship, and the country's real ruler is the National Guard commander, General Manuel Noriega.

Panama faces problems, starting with the effects of the larger Latin debt crisis, which has dried up the normal flow of capital to the region. And the United States has every reason to try to get along with whoever governs Pana-ma. But these realities do not oblige Washington to pretend that the power plays and brutalities of a military regime are consistent with democracy. General Noriega should not underestimate the United States's strategic interest in Panama's political future.

America's access to the Panama Canal depends in the first instance on the stability of the regime that guarantees it. That guarantee is worth no more than the regime's credibility

#### The Art of Cutting Red Tape

[Christo] is the subject of an array of books and movies. And like some other artists in history, artists like Leonardo, Michelangelo, Titian, and, in our own day. Picasso, he is known simply by the one name. Unlike them, he is that modern phenomenon, a man famous for being famous. To say that, though, is to

The sheer scale of Christo's projects, the

energy with which he pursues them (the wrapping of the Pont Neuf has been on his list since 1976), and the skill with which he consummates them are in a class apart. It was not simply a question of the ingenuity of wrapping the 12-arched bridge in silken pleats while the traffic kept rolling, it was the little matter too of persuading hard-mut politicians such as Paris Mayor Jacques Chirac and President François Mitterrand that it was worth doing.

- Michael McNay, The Guardian (London).

FROM OUR OCT. 4 PAGES, 75 AND 50 YEARS AGO

1910: China Opens National Assembly PEKING - Today [Oct. 3] is notable in China's history, witnessing the inauguration of the Constitutional Assembly, the first Chinese national body embodying the principle of popular representation. The greatest enthusiasm prevails throughout the empire and the Dragon flags are flying everywhere. In opening the Assembly, the Regent declared that it represented the people's verdict, and although only the initial step towards a constitution it was an emblem of hope in the country's great future, showing that China is in accord with the world's progress. The Regent recognized the need for improved conditions and harmony between all classes. The inauguration of provincial Assemblies last year marked the first stage of representative government in China. The Constitutional Assembly extends the representative principle to the empire as an entity.

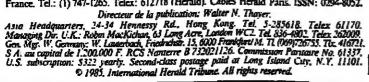

1935: Italian Troops Invade Ethiopia PARIS — War began in Ethiopia [on Oct. 3] with the advance of Italian troops on two fronts. Adowa, scene of Italy's defeat 39 years ago, when 14,000 Italians fell before the spears and guns of Ethiopian warriors, was bombed by Italian warplanes. Mussolini's Air Force also rained bombs on the nearby towns of Adigrat and Agame. Hundreds of people, including women and children, were killed, ac-cording to Addis Ababa dispatches; Rome dismissed the charge as "an old and muchabused expedient." Messages pouring out of the Ethiopian capital told of the Italian advance. The Italians began their forward movement before dawn from Wal-Wal, on the Italian Somaliland frontier, in the south, as well as from Eritrea, in the north. A Custos Agency dispatch published in Paris gave total casual-ties in the first day's advance as 1,700.

### Gorbachev's Charm Campaign Backfires

WASHINGTON — During the Andropov-Chernenko era, the central aim of Soviet policy was to get Western front groups to stop the de-ployment of medium-range missiles in Europe. That failed. The central aim of the Gorbachev Kremlin is to stop U.S. testing of space-based defense weapons, this time using the most modern communications techniques to appeal to "world opinion."

The Charm Offensive must have seemed like a great idea to the new Soviet leadership. Western media of-fer easy access for the Russian antispace-defense message. But Mikhail Gorbachev is beginning to discover that playing with public opinion is playing with fire.

Credibility abroad. Watching him

answering questions on television, Western viewers no longer compare him with his dour predecessors; they measure him against his buildup. By William Safire

He is not as smooth as cracked up to be. He takes long, dramatic pauses before saying ominously — never in pessimism, mind you — that "we have reached a point beyond which events may get out of hand." This is intended to strike fear in the hearts of his listeners. But he is not such a hot actor. His dramatic pauses are melo-dramatic; television's eye resists such

attempts at manipulation. Credibility at home. The Kremlin decision to go public with its appeal for a defense freeze exposes the Soviet people (no longer "peoples") to the sight of their leader saying what the average person knows to be untrue. In an interview telecast in the Sovi-

et Union as well as France, a French interviewer, Yves Mourousi, dared to

### Life in a Nuclear World: Scant Cause for Optimism

By John Ausland

This is the second of two articles.

Optimistically about the future.

Not only has man shown a historical penchant for fighting wars, but now he lives under the shadow of a gic nuclear forces, they say, would involve the use of perhaps 10,000.

The destruction would be the last, one that gives the nuclear powers the means to wipe out fragile civilizations built over the ages. Even if the world's leaders show no desire to engage in nuclear war, it is not easy to escape the fear that they will stumfrom this dangerous situation hucleble into one.

danger does not exist. To embrace simplistic slogans about nuclear Although there is controversy about freezes and nuclear-free zones is to what this number would be, it could freezes and nuclear-free zones is to

embrace empty hope.

The hard reality is that there are 50,000 nuclear warheads in the world. Possession is limited to a few countries: the United States, the Soviet Union, Britain, China and France. Perhaps Israel has a few warheads, and other countries certainly have the means to produce them.

The countries that have nuclear weapons are locked in historic struggle. There is little chance that the Soviet Union will give up its ambitions to become a global power or that the Western allies will cease to resist this. We must reconcile our-

selves to continuing struggle.
Fortunately, nuclear arsenals have a chastening effect: They lead American and Soviet leaders to treat each other with respect. In 40 years, there has not been an accidental nuclear explosion or an unauthorized firing. But if a conflict should break out, the question of using nuclear weapons would arise. It is uncertain whether American or Soviet leaders would be prepared to be the first to use nuclear weapons. But one cannot be sure.

Concerns over the scope of damage in a nuclear war have been magnified many times by the realization that an atomic war could provoke a "nuclear winter," a drastic change in climate that might wipe out mankind, at least in the Northern Hemisphere.

This threat is bound to have come to Moscow's attention, and Washington clearly is taking it seriously. The National Academy of Sciences has given a preliminary endorsement to the nuclear-winter concept, and a Pentagon study concedes that there may be something to it, but adds that this is no reason to alter strategy.

was a tolerant man.

this apparent frivolity.

gallant, astride his bronze horse, screnely gazing over his bridge—the Pont Neuf—suddenly wrapped like a

SLO — It is not easy to think Some people see the nuclear-winter warheads. The destruction would be unimaginably catastrophic, even without a nuclear winter.

Those who espouse the nuclearar stockpiles must be drastically re-It does no good to pretend that the duced, leaving them below the level that would trigger a nuclear winter. be as low as a few thousand, perhans 1,000 warheads on each side.

But it takes great optimism to foresee the nuclear powers agreeing to such drastic reductions.

Even if the number of warheads were significantly reduced, the question of whether defenses are desirable would remain. In fact, radical reduction of the number of offensive weapons would make defense a more reasonable possibility. Even if it were not technically possible to have an effective space-based defense, the United States, and eventually the Soviet Union, could decide to use antihallistic missiles to protect their landbased nuclear forces.

If, as is likely, the leaders of the nuclear powers are not prepared to make drastic reductions, we must content ourselves with continuing to live in an extremely dangerous world. Negotiations will continue, if only

because Western governments need them to calm their publics and the Russians seek them to divide their Russia will always be a problem beopponents. Some agreements may be cause Finland is where God, in his negotiated, but they will not significantly change the basic equation. The military, it seems clear, will always stay ahead of the negotiators. I wish greater optimism were possi-

ble. It is not. We have little choice but to reconcile ourselves to life under the nuclear sword.

Our only real hope must reside in the belief that the leaders of the nuclear powers will continue to avoid any conflict in which the the use of ear weapons might be considered. The nuclear powers, for all their mutual antagonism, have little interest in mutual suicide.

A Bad Wrap? Henry Just Might Have Approved

P ARIS — What, one wonders, would Henry IV off until he attended that Mass five years later.

With the Edict of Nantes in 1598, Henry gave

## Attack in Tunis Shows Frailty of U.S. Policy

By Philip Geyelin

WASHINGTON — Only the ready to talk to "all parties in pursu-VV choice of Tunisia should have ing a negotiated settlement, in an come as a surprise; Israel's sense of environment free of belligerent and how to accome the settlement of how to provide for its security was hostile acts." well-established in Iraq in 1981 and in Lebanon for the last three years. United States tends to its own interests in the Middle East.

had a large part of the lesson right: scheduled meeting at precisely the U.S. security, as he understands it, lence from whatever quarter they come, and without respect to the pre-sumed rationale for them," he said in response to the Israeli raid on the plications for U.S. policy. condemnation, words have no mean-ing. But Mr. Shultz was in New York,

at the United Nations.

And it was to the White House that
Israel was looking for renewal of its
license to practice "self-defense" outsides the bounds of international law. Talking by phone to Israeli officials, moments after the statements from President Reagan and his spokesmen granting "legitimacy" to the Israeli violation of Tunisian sovereignty,

you could almost hear them smile. There lies the rest of the lesson: The best-intentioned efforts to promote a Middle East "peace process" are of no account for as long as the United States allows itself to be jerked around by its closest Middle East ally. This is not new with the

Credibility with kidnappers. An un-expected downside to Mr. Gorba-

Mr. Arafat, in turn, is no more than the best of a very bad lot in the splintered PLO, whose worst elements do not want either Mr. Arafat

nappers to tell its Syrian client to ease up on the terrorists' friends, but nei-ther can Mr. Gorbachev fail to react. If he does nothing about protecting his nationals, he will be seen in world opinion as being as weak as Mr. Reagan has been, but if he slams the Sunni Moslems, there goes Iraq.
Thus does "Smilin' Mike" discover

that publicity, so easy for a world leader to get, can turn pitiless. The New York Times

"exceptions" to Soviet policy in re-unifying families "when individuals in point know state secrets" - meaning Andrei Sakharov, the dissident scientist who has been kept out of touch for decades — but claimed "we will continue to resolve these questions without fuss, on the basis of a

percent. Most of them are people well known in the country."
That is the old Hitler technique: If

you tell a lie big enough, some people will believe it. Most Russians are well aware that there are virtually no Jews at the top of the party, the military, the KGB or the foreign service. The number of Jews permitted higher education has been cut in half in the last 15 years. Why do at least 350,000 Jews ache to leave the Soviet Union?

chev's courting of opinion is the Russians' new vulnerability to terrorism. The only governments terrorists try to intimidate are those concerned with opinion. With the crowd-pleasing Mr. Gorbachev in power, some murderous zealots seem to feel Moscow is no longer above blackmail. Russia cannot be forced by kid-

Mr. Gorbachev said there were

humanitarian approach," Sure. Mr. Gorbachev then warmed to his topic. "You mentioned the 'Jewish question.' I would be glad to hear of Jews enjoying anywhere such politi-cal and other rights as they have in our country. The Jewish population, who account for 0.69 percent of the entire population of our country, are represented in its political and cultural life on a scale of at least 10 to 20

not be conscious of the crippling con-tradictions in its approach.

On the one hand, it engages King Hussein in a carefully coordinated strategy to produce direct negotia-tions involving Israel, Jordan and some kind of Palestinian representa-tion. The PLO chairman, Yasser Arafat, has been inextricably entwined in this effort as a would-be arbiter in selecting those Palestinian representatives. The administration accepts that King Hussein cannot move far without Mr. Arafar's acquiescence.

> or King Hussein to move at all. Yet, on Monday, there was Ronald Reagan at the White House praising Hussein for "moving steadily and courageously forward." The king, for his part, was repeating to Mr. Reagan "Jordan's unwavening position in condemnation of terrorism, irrespective of its nature and source."

Meantime. Israel had already ser out to assassinate Yasser Arafat. The lesson with large in the Tunisian bombing, then, says less about the lawlessness of the says less about the lawlessness about the law lawlessness of the way Israel looks to the Israelis' American-made jets so its national security than it says about the mindlessness of the way the United States tends to its own interreliable evidence that only by chance Secretary of State George Shultz did Mr. Arafat not show up at a

requires steady efforts against whatever odds to deal with the sources of strife and instability in the Middle reason enough to want to strike back strife and instability in the Middle reason enough to want to strike back at terrorists by way of deterrence; it suffers cruelly at their hands. But consequences count, the more so when they are predictable. That Mr.

Palestine Liberation Organization fa-cilities near Tunis. If that is not a condemnation, words have no meansassination. It professes to be pushing a peace process. And it

> The best efforts to promote peace are of no account so long as America lets itself be jerked around by its closest Mideast ally.

Reagan administration. What may be retaliation against terrorist attacks as new is that the administration may a "legitimate expression of self-denot be conscious of the crippling confense"—a policy that it apparently lacks either the will or the wit to practice for itself.

Make that a four-car collision: By proclaiming Israel to be a U.S. "secunity asset," the administration reguever Israel may do in its own interests is perceived by the administration to be in U.S. interests as well. So when the White House confers "legitimacy" on Israeli strikes against terrorist nests, wherever they are, it ought to

be clear what it is legitimating.

Defense Minister Yitzhak Rabin of Israel made it pretty clear: No "immunity" anywhere for terrorists in general and for PLO headquarters, in particular. Did that include Jordan, where the PLO has offices? Mr. Rabin scarcely needed to repeat himself; he had already pointedly and publicly warned of "dangers" to King Hussein if security on the West Bank "deteriorates."

Now you can make a case for one or another of these policies - but not Capitol Hill, explicitly telling a meeting of House members that "Jordan in a peaceful settlement while giving recognizes the right of Israel to exist." ### The Finns Are Looking Down No Longer

HELSINKI — The Finnish capital's monumental sculptures look gloomily groundward. Each of Finland's past presidents has a memorial, each downcast. The equestrian statue of the great Carl Gustaf Mannerheim, modern Finland's sav-ior, stares moodily down. The bear at the door of the National Museum looks at the ground. Why are they all so depressed? The Finns are a cheerful people, very different from their neighbors and former rulers, the Swedes - among whose many admirable qualities gaiety cannot be counted. The Finns can be gay, hard

though their national life has been. The problems with which they live inscrutable wisdom, chose to put it: controlling both sea and land approaches to Leningrad, ex-St. Petersburg. In the past, even when Finland was a Russian grand duchy, after the Swedish crown had ceded it to Russia in 1809, the Finns managed to defend their autonomous laws and institutions, their separate crown (the czar became their grand duke), and their Lutheran religion.

After World War II (when Fin-land, of course, had allied itself with

Germany in order to recover the territory lost to the Russian invasion of 1939-1940), the Firms managed to maintain their autonomy. They

France a rare interim of religious tolerance. He also

ordered a grand program of useful engineering works, including the completion of the Pont Neuf, which was opened in 1607, 29 years after work began.

Interestingly, Henry quashed plans to build mer-chant housing on the bridge, objecting that it would

block his view from the Louvre palace. It took nearly

two centuries more for esthetes to raze the similar

buildings on the bridges upstream, resulting in the

I doubt Henry would have been terribly shocked to

see his bridge in a shroud. He could hardly have

foreseen an age when packaging would be everything contents nothing. But in his lifetime the bridge and the

adjoining Place Dauphine were a court of miracles where clowns and mountebanks of all kinds held sway.

He has, in short, seen worse. His conclusion might be

something like that of a famous maître d'hôtel of the

Belle Epoque who, when asked why he practiced flam-beeing, replied: "It pleases the clientele, and it doesn't hurt the food very much."

adopted a foreign policy of strict neutrality, meant to reassure Soviet leaders that Finland would defend its own territory, and thereby Russia's, even from an intrusion from the West. At the core of this policy, developed between 1944 and 1947, was The '40s and '50s were

Funs are more open. Finland is booming. that Finland abstained from any

comment on superpower matters that did not directly concern it.

There has recently been a charge

in the quality of this neutrality that has noubled some Western observers and some Finns as well. Two inci-dents are cited. Finland's govern-ment two years ago took a formal stand in favor of the total prohibition of nuclear weapons. This was consis-tent with Sweden's position, but amounted to a criticism of the North Atlantic Treaty Organization doctrine that holds it is indispensable in the deterrence of Soviet attack that NATO not renounce the first use of

> will have no desirable effect. There is a further explanation, however, for what the Finns now call "positive neutrality." Past policy ex-pressed exactly that deep pessimism reflected in the public art of the capital. The 1940s and '50s were desperate years of draconian indemnities to Russia, in a Cold War atmosphere

bors, even lecturing the West, because they have a new confidence in themselves. They feel good about their future.

They have reason for this. Finland today is prospering, booming. In re-cent years the country has experienced consistent economic growth at a rate of 3 percent or better, with rising employment and falling infla-tion (6 percent expected this year, 5 percent forecast by the Organization for Economic Cooperation and Development for 1986). Investment as high Since the 1960s, Japan is the only advanced industrial nation to enjoy a higher consistent rise in wealth per inhabitant than Finland. This comes on top of an already high level of individual wealth higher than in Britain. The Finns boast that they have become the Japan of the north. This is not an empty claim.

The dynamism and new optimism of the Finns is reflected in the comtry's foreign policy. This is a sign of confidence, not of weakness. Indeed, a troubling question for the future is not Finland's overshadowing by Rus sia but the reverse. How will the Russians react as the contrasts widen between their own backward economy and retrograde society and the prosperity and dynamism of the five million Finns? These Finns once made up a poor and tural province of the czarist empire. Their prescrit prosperity is displayed on television prosperity is displayed on te programs seen in Russia, in a language understood in Estonia. # Parisian Anglers' Renaissance

ARIS — That Parisians are very con-trary is hardly news. Pleased with themselves for being Parisian, they nonetheless use the word parisianisme to denote a sort of factitious sophistication. Urbane, they detest city slickers. In-stead of skyscrapers and Mr. Pel's pyramid. they cherish for their village-like atmosphere

#### MARY BLUME

small squares like the Place Dauphine. Even families who have lived here for generations are nostalgic for their rural roots.

So it can only come as good news that even the most dynamic Parisian executives may soon hang on their glassy office doors that most sympathetic of signs, "Gone Fishin". In the once-polluted Seine, the fish are bitting again and fly fisherman are heading for trout-stocked lakes in the Bois de Boulogne.

Last week at the fourth Salon de la Pêche de Loisir, an international trade show for fishing tackle manufacturers, there were the usual displays of rods and reels, dry flies, wet flies, streamers and nymphs, waders and creels. There was also a display stand for APNLE (l'Association des Pecheurs de Neuilly-Levallois et Environs), a group that has pioneered trout fishing in the Bois. promote prace and

APNLE is headed by a massive, blushing sapeur-pompier named Edouard Armirail who is based in a landlocked Paris firehouse but who dreams of the trout in his native Pyrenées. Almost single-handed, he has organized the stocking of six lakes in the Bois de Boulogne, as well as fly fishing lessons for members of his group and jolly meetings where Parisians can tell each other about the one that got away. On APNLE's display stand was a huge stuffed carp caught in the Bois. It weighed 27 kilos (59.5 pounds). Another stand at the show belonged to the

fishing magazine "Le Pêcheur de France," which has in the its current issue a splendid article, "Take the Metro to go Fishing." It was written by Michel Droulhiole — who also covered urban angling for Le Monde with photographs by an ardent native Parisien angler, Jean-Claude Duforat. Both men are in their 30s.

The Seine is a lot cleaner than it once was and fish are rising to the bait. The older generation of fishermen with their long bamboo rods has died out and younger Parisians do not yet know of the pleasures in store: At the moment, Duforat reckons, there are only 200 anglers in central Paris. It is, so far, a sport devoid of snobbery - popular and

The quality of the Seine was deplorable from 1968 to '78, and 1973 was the most polluted year of all," Droulhiole said. "That was such a bad year that things could only get better, and they have." Of course the passerby (the Paris angler

who seeks peace may as well hang up his rod) always ask the fishermen if they eat their catch. Duforat's answer is always the same. "Sure, and I don't need to grease the pan because they are so oily." In fact the quality can be so good that some anglers are thought to be professional restaurateurs cutting

down on fishmongers' bill. "Fishing is Paris is very difficult, very chancey — a 3- or 4-kilo carp can get across "You can get 20 kilos a day or nothing at

Isn't that the usual angler's lament? "Yes, but Paris is particularly tricky, and Paris is particularly full of fish."

The most common catches, rubber tires and old boots aside are gardon, or roach, which is fried when small and baked when large; arbelette, which translates into the unfortunate name of bleak; sandre, which doesn't seem to translate at all; and the occasional pike and perch. Fishing is allowed all year a cept for a brief closed season on pike, and the simplest tackle will

The two best spots for city fishing are probably the Allee des Cygnes, below the replica of the Statue of Liberty on the Pont de Grenelle, and the bank of the Ile St. Louis between the Pont Louis Philippe and the island's western tip.
Thocarp off the Ile St. Louis are especial-

ly lively," Droulhiole said, "and for some reason they always follow the same route, starting from the bank, swimming to the Pout Louis-Philippe, and then taking the diagonal to the Hotel de Ville."

The carp at the Ile St. Louis are very strong," Duforat said. "A three-pounder has as much fight as a ten-pound trout."

NOTHER good spot is next to the outdoor swimming pool, the Piscine
Deligny. The long-popular Canal St. Martin is terribly noisy and parts have been blocked off, but at its bottom hirk ecrevisses américaines eager to swallow a hook baited with potato or carrot. (A French company that specializes in powdered ground bait to be sprinkled on the water's surface - flavors include couscous, barley and coconut mmends a mixture called Magic Sensass for Paris, but ordinary maggots or earthworms are sufficient and can be found more easily than one might suppose at stores along

The left bank of the Ile St. Louis is too noisy for pleasant fishing. The Ile de la Cité offers Notre Dame but nothing special in the way of fish. The Pont de la Concorde is one of the rare spots where one can find tanche, a fish the Larousse Gastronomique describes as delicate when it does not taste of mud.

Duforat said it was not rare to catch 20 kilos of fish within four hours. "In that case, I take them out of the water, I look at them. I photograph them. And then I put them back in the water. I might keep one for dinner, but not the biggest because that is rarely the best one to eat.

He is skillful enough to have entered trout fishing competitions in the Bois de Bonlogue, but he does not believe in such contests. "They are too serious. Fishing is seri-

ous, but one mustn't take oneself seriously.

The organizer of the trout competition Edouard Armirall of APNLE, said the lakes in the Bois always contained 800 to 1,000 trout these days. "We add about 200 kilos a month," he said, "and they range in size from 300 grams to 8 kilos." The next big competition, Oct. 13 at the

Lac du Reservoir near the Grande Cascade, is expected to attract 120 contestants, including some from England. Said a British fly-tier, who was showing off his craft at the fishing tackle trade show, "Anyone mad enough to go trout fishing in the Bois is mad enough to buy one of our flies to fish there."

The pragmatic Englishman was not reckoning with the special dreaminess of Pari-

sians. "We would like to think of people coming home from their offices, picking up their fishing gear and just dropping a line for an hour or so. What relaxation, what escape," Edouard Armirail said.
"It was a crazy dream at the beginning," he added. "But sometimes crazy dreams

work." They do: Although Paris-based his is the biggest fly-fishing club in France. Armirail and his fellow fishermen are probably reflecting a collective nostalgia of the sort that inspired a prefect of police nearly 20 years ago to declare hunting season

open in Paris.

When a city councilman objected that hunting was illegal in Paris, the prefect, Maurice Grimand, poetically replied: "The prefect of police did not wish to

deprive Parisians of dreams so badly needed in urban settings. He liked to think that because the season was open, more than one Parisian might go to work of a morning a little less morosely, dreaming, as he passed building sites, of open land and forest trails, and mistaking for a friendly gamekeeper the first traffic cop he meets.'

the Seine in no time at all," Drouthiole said. Waiting for a nibble behind Notre Dame.

# Political David Hare, Leader Of the Angry Younger Men

by Mel Gussow

Herald Tribune.

EW YORK - For a playwright, the moment of artistic self-identification can come with his first produced play, or, perhaps, with an early effort. In David Hare's case, the turning point occurred with his third fulllength play, "Knuckle," a convoluted mystery dealing with corruption.

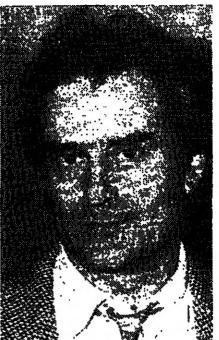

The circumstances of the play are characteristic of the author's unorthodox career:
After finishing it, he showed it to his agent,
who rejected it. Hare then gave it to another
agent, who loved it. "Knuckle" was optioned by a major commercial producer and presented on London's West End in a 1974 production starring Edward Fox and a Canadian actress named Kate Nelligan, Hare, largely known as a promising playwrightdirector in the alternative theater, was convinced that the play would be a success.

As it turned out, the reviews were generally negative and the audiences nonexistent. In day, the playwright went from elation to depression. The play ran, however, and people began discovering it. Some stormed out of the theater in outrage, others returned to see the play again. What gave Hare confidence was the knowledge that he could evoke passion in people. "Knuckle" confirmed his hope to be a playwright, and it branded him as controversial. In the 11 years since, he and his work have been surrounded by what he refers to, melodramatically but accurately, as a "swirl of passion."

All of his plays — including "Plenty," the film version of which recently opened; "A Map of the World," which opened this week at the Public Theater in New York; and "Pravda," the Fleet Street comedy written in collaboration with Howard Brenton - as well as his movies and television films have provoked similar reactions, polarizing audiences and critics.

That Hare is a playwright with a political consciousness - at 38, the most prominent of a second wave of Angry Young Men only deepens the controversy. At issue in his work are such subjects as the collapse of the British empire, the debilitating effects of the class system, the myths of patriotism, the loss of personal freedom. Peter Hall, artistic director of London's National Theatre, who produces Hare's plays, calls him "one of the great disturbers" — a disturber of the theatrical peace.

NOWING Hare only from his work, one would expect to meet someone abrasive instead of the polite, genteel person he is. Not until a recent lunch in New York did I become aware of the depths of his reserve. With a suspicious glance at my tape recorder he said, "My girlfriend said the other day, "If people who think of you as a well-known playwright only knew how much of your time is spent cowering in doorways in order to avoid meeting people you're too shy to speak to - "

David Hare

Heller says it has nothing to do with power. sex or position. It's just that in some people's presence, other people can't make sentences. They talk gibberish. That's me."

Having watched him direct actors in rehearsal and heard him mimic some of his contemporaries, I suggested that perhaps he had a latent talent for acting. He seemed horrified at the thought. "I can't act," he said flatly. "Acting involves access to your feelines. I can't summon up a feeling without becoming self-conscious."

Despite his shyness, he can be extremely articulate. Probably those who give him the whammy do not know it. The impression he gives is one of cool aplomb, and with friends he warms up and becomes expansive.

In public terms, Hare's breakthrough came with "Plenty," a play that reflected his youthful obsession with World War II. Hare's heroine, Susan Traherne (played in London and New York by Nelligan and in the film version by Meryl Streep), works with the French Resistance. She is bitterly disillusioned with her postwar life, a period paralleled by the decline of Britain as a world power. The play ends with a flashback, Susan on Armistice Day, in a field in France, embracing her life to come with the vow, "There will be days and days and days

Hare's later collaborator, Brenton, said in admiration: "That line is irony with an almost tragic weight. You're thinking, 'Indeed, Susan, there will be days and days like that - and you're not going to have any of

Referring to Joseph Heller's novel "Some-thing Happened," Hare explained: "Some-people give other people 'the whammy.'

When "Plenty" opened at the National Theatre, the reviews were discouraging. Stubbornly. Hall kept the play in the reper-

tory until, slowly, it gathered an audience and critical respect. Four seasons later, "Plenty" went to Broadway and was an immediate, though controversial, success.

For a time after "Plenty," Hare was at a loss for a subject. Then, on the way home from Australia, he stopped in Bombay and his mind was bombarded with images of the Third World. The result was "A Map of the World," which views the entire Third World through a UNESCO conference whose principal speaker is a character named Victor Mehta, an esteemed Indian novelist who in the course of the play is pressured to recant political positions. Mehta, played in New York, as at the National, by Roshan Seth (Nehru in the movie "Gandhi"), is deeply conservative, politically the opposite of Hare. Yet Mehta's arguments are presented with so much wit and charm as to convince anyone unfamiliar with Hare that he is meant to be the playwright's spokesman.

N London, Anthony Hopkins won ac-claim as Hare and Benton's character Lambert Le Roux, a diabolical pirate. most of whose victims deserve to walk the plank. He is the dark soul of "Pravda," a composite comic portrait of Fleet Street tycoons. Lambert makes an art of soul stealing. After seeing "Pravda," the novelist Philip Roth sent Hare a letter saving that the playwright's major talent was obviously for the satanic and the malign. "That certainly gave me pause," Hare said.

"Pravda" was Brenton's idea, proposed last year as a subject too large for one of them to handle alone. Though each writes his plays with painstaking slowness - Hare in longhand in his London study - they did "Pravda" in a flurry, eight months from first word to opening night.

Besides the sinister Le Roux, there are

various hypocrites, frauds and fools on stage, in the government as well as in the press, including a drama critic who sleeps under the copy desk and a rising young journalist who offers a moral justification for a newspaper's not admitting its mistakes. People trust a newspaper, he says, and to print a correction is "a kind of betrayal. It's a matter - finally - of journalistic ethics."

Though the play is a collaboration, it is right in line with Hare's insistence that plays should respond to their times. For him, being a political playwright comes with the national territory — and his major theme is "the cost of living lies" and the price one pays for "deciding not to live lies.

One of the many paradoxes of Hare's life is that, while remaining true to his politics, he has become an insider, sending his mes-sages out from major platforms, beginning with the National, where he is an associate director as well as playwright. As a confirmed leftist, he could be regarded as a mole in residence - except that he is a mole welcomed by the man in charge, Hall, who seems to regard him as a kind of house

Hare sees no contradiction in his presence Continued on page 9

## Stroheim's Art Recalled in 100th Anniversary Year

by Thomas Quinn Curtiss

RICH von Stroheim died in 1957, known to younger moviegoers chiefly as the defeated film director turned former star's valet in "Sunset Boulevard," and remembered by surviving studio bosses for his insane insistence on realism and his generous spending of their money.

As a pioneer, together with D.W. Griffith and Charlie Chaplin, he raised American cinema from mechanical mediocrity to an art form. This year is the centennial of his birth, and his contribution is being rediscovered. A program of films he directed found responsive audiences in Los Angeles, and a newly edited version of his unfinished film "Queen Kelly," which he wrote and directed for Gloria Swanson at the request of Joseph P. Kennedy, was recently

A legend of Hollywood's golden age, Stroheim rose from the ranks of extras to command some of the most amazing and original projects in cinema history. Once he plotted a coup to occupy Universal City with troops and take over its management. He abandoned the plan on his wife's advice:
"They don't do such things in America."

Ben Hecht referred to him as "the wild man of movie-

land." For Sergei Eisenstein he was the director. Louis B. Mayer disliked him for his low opinion of Mayer's mental-

ity and his cynical remarks about women.

He was born Sept. 22, 1885, in Vienna. His account of his background has been questioned; the enobling "von" in his name may have been his own addition. He is said to have

In about 1909 he left Austria to try his luck in the United States, where he wrote for a local German daily, did a hitch in the National Guard, sang ballads in beer halls. As a traveling salesman for a dress company he reached San Francisco in 1912. In California he worked as a railroad section hand, as a forest warden and as a lifeguard at a Lake Tahoe hotel. His cavalry training brought him a job as a riding master and he arrived in Los Angeles in charge of a carload of horses.

OLLYWOOD was already a center of filmmaking in 1914. This jack-of-all-trades Austrian decided to try acting. After long waits in the extra pools, he made his screen debut as a black Confederate soldier who falls from a roof when pierced by a Yankee bullet in "The Birth of a Nation." D.W. Griffith, Douglas Fairbanks and others engaged him as an assistant and part-time player, giving him a chance to study the new-langled medium's chniques thoroughly.

When the United States entered World War L, Strobeim's accent, sinister scowl, monocle and military manner might, have led to his arrest; instead they contributed to his cinematic progress: He was cast as a dastardly Hun in propaganda films. Billed as "The Man You Love to Hate," he was seen seeking to seduce Red Cross nurses, throwing babies out of windows and ordering Belgian peasants executed by firing squad. Carl Laemmle, the German-born founder of Universal

Pictures, visited the scene of this villainy and congratulated

been educated in a military academy and to have served as a Stroheim on his realistic acting; Stroheim begged a private re-created and Emperor Franz Josef's golden carriage pur-sudience, sold Laemmle a script he had written, won chased for a parade tableau. permission to direct it and secured the leading role, that of an Austrian doctor on furlough in the Tyrol who makes a

fatal play for the wife of a visiting doctor.

He had titled it "The Pinnacle," but Laemmle said: "People will confuse it with 'pinochle.' We'll sell it as 'Blind Husbands.' There are more of them than pinnacles."

"Blind Husbands" struck gold. It was different, a bit shocking, expertly acted and directed, introducing a fresh style. It established Stroheim as a leading filmmaker. Laemmle was delighted with his find, who without delay delivered "The Devil's Passkey," set in Paris after the

Armistice. Strobeim wrote and directed but did not act in it.

He then designed a glittering spectacle of high life in co slums — and filmed it not in a studio but in the mean He then designed a glittering spectacle of high life in Monte Carlo, with the central role written for himself: an imposter preying on idle rich women. Entitled "Foolish Wives," it was advertised as the first million-dollar movie,

and the "S" in his name was a dollar sign.

During its filming, trouble began to brew. The production required almost a year to complete and the writer-director-star had a habit of adding scenes to his script. He refrained from this only when his cameras and lights were taken away from him. The miles of film he had shot were given to others to edit, which angered him greatly. Nonetheless, the venture was a huge commercial success, with complaints about its immorality bringing long lines to the box offices.

Another lavish spectacle seemed in order, so Stroheim wrote "Merry-Go-Round," set in Vienna before and after the war. He had Vienna's streets, palaces and playground

A young Universal executive, Irving Thalberg, viewed these expensive preparations with misgiving. He had another actor take the role Stroheim had written for himself; then, after several weeks of shooting. Thalberg replaced Stroheim with a studio hack as director — a high-handed move that shocked Hollywood, for it meant that studio executives would henceforth be in actual command of

Other studios, however, were eager for Stroheim's services. The Goldwyn company signed him at once and left the subject matter to him. He chose Frank Norris's 1899 districts of the city and in Death Valley, site of the novel's finale. Six months later he delivered his masterpiece, named

after the novel's theme: "Greed." Meanwhile, though, Goldwyn had merged with Metro to form MGM. Stroheim's bosses were now Louis B. Mayer and his old nemesis Thalberg, who had joined MGM as manager of production.

"Greed's" 42 reels required seven hours of projection, which Stroheim proposed splitting into two showings. Mayer and Thalberg rejected this suggestion and a shorter compromise, butchering the film down to 10 reels. Even in this form, however, it retains its majestic sweep of destiny and its dramatic impact. Before he could terminate his association with MGM.

Continued on page 9 Erich von Stroheim

Recent recordings by minimalist composers include "Satvagraha" by Philip Glass, above, "The Desert Music" by Steve Reich, left; and two albums by Terry Riley.

# New Notes on the Minimalist Aesthetic

by John Rockwell

T EW YORK - The founding trio of minimalist composers — Terry Riley, Steve Reich and Philip Glass — have long resented being grouped together; Reich has been particularly bitter about what he feels to be a diminishment of his individuality. Yet the grouping, especially the pairing of Reich and Glass, continues, and not just by critics. It is perpetuated by the record companies, which have poured new releases by all three onto the market recently. One company, Nonesuch, almost simultaneously came forth with recordings by Glass and Reich.

Despite wounded egos, the grouping continues to make sense. The three share an overall meditative, repetitive aesthetic, one that rewards concentrated attention to subtly shifting configurations of reduced materials. Their very differences, ever more overt over the past two decades, do not so much invalidate the grouping as cast fascinating new light on what they still share.

The most noteworthy of the new record releases from this urinity — albeit an unfortunately flawed album — is Glass's three LP "Satyagraha." The release is noteworthy because this. Glass's first opera for conventional forces (completed in 1980, following "Einstein on the Beach" for electric ensemble and untrained voices, and preceding "Akhnaten") is one of his finest

free and unify India and to prove so powerful a weapon in the American civil rights struggles of the 1960s. The text is drawn from mythically appropriate passages from the Bhagavad-Gita and sung entirely in Sanskrit. The music, scored for unamplified operatic soloists, chorus, strings, winds and electric organ, captures with enormous conviction the rapt, meditative quality

The CBS recording was made with the New York City Opera, which will bring the work into its repertory next fall; it has much to recommend it. Douglas Perry is the fine Gandhi, and Claudia Cummings, Rhonda Liss, Scott Reeve, Robert McFarland and Shery! Woods provide satisfying vocal authority in the other parts. On the whole, the City Opera chorus and orchestra handle the music tidily, too, though without the richness and weight brought by the Wurttemberg State Opera in its production in Stuttgart (as seen on a German telecast tape).

And here we begin to encounter the problems. Overall, this recording is too brusque, quick and overwrought to best convey the glowing calm of Glass's music. This is odd, since the composer was involved in the choice of performers and in the recording process. But the conductor, Christopher Keene, consistently chooses tempos that are too fast, and shapes the phrasing too bluntly — as he does in so much of the more familiar music he conducts with the City Opera.

Dennis Russell Davies in Stuttgart, who treated this score as if it were a descendent of Bruckner's symphonies and of Wagner's "Parsifal." has a far more sympathetic insight into its The subject is the young Gandhi in South Africa, as he crystallized the philosophy of nonviolence that was later to help before the first American performance, then sliced away still

more for the recording, which contributes to the abrupt quality.

The recording was made like a rock record, with multiple overdubbing to achieve the ensemble effect. That might contribute to the sense of schematic rigidity in the musicmaking, except that Keene's conducting too often sounds that way in the theater. More damaging is the use of reinforcing synthesizers and artificial echo. There is nothing wrong with either of these techniques - both can be exciting, especially in music conceived with such timbral mixing in mind. But here the additional synthesizer parts lend the loud portions a tubby bassheaviness and a crude, neon-lit brightness.

It's as if not just Keene but those overseeing the production. Kurt Munkacsi and Michael Riesman, distrusted Glass's work for conventional classical forces and wanted to reclothe it in semi-rock guise. As members of Glass' ensemble, perhaps they miss the punchy electronic intensity of that sound, and have thus, consciously or unconsciously, made the "Satyagraha"

orchestration conform more closely to what they're used to. That all said, "Satyagraha" remains a lucid, limpid joy for anyone susceptible to its charms. This is the only recording the work is likely to get for years to come, and it hardly destroys all

the work's many beauties.

Also out is Glass' single-disk soundtrack album from Paul Schrader's film "Mishima." Although Schrader cut the film to a temporary synthesizer version of the music, he also made the inevitable nips, tucks and pads, adapting the music to his needs.

#### TRAVEL

### **Travels Without Donkey** In France's Wild Cévennes

by Joseph Fitchett

LORAC, France - A corner of France that has eluded the national passion for domesticating nature is the Cevennes, a mountain range in southwest France. Its winding river canyons, bare mesas and wooded hillsides are unspoiled. Dark slate-roofed hamlets, isolated and ageless, are often accessible only by a

hump-backed stone bridge. Tourism in the Cévennes considered thin fare compared to the gastro-nomic and cultural richness of Provence across the Rhone river or the Dordogne to the west - offers increasingly varied accommodation and interest.

A watershed between the Atlantic and the Mediterranean, the Cevennes offer contrasts that are savage by French standards. In winter the high plains are lashed by snowfilled winds that can bend double a crosscountry skier. Summer is torrid, searing the hilltops and warming even the mountain-led River Tarn on the floor of its winding, wooded gorge. Seeking pasture, sheep climb to cooler air: In the Cevennes are France's last drives of sheep on the hoof (not in trucks).

The people of the Cevennes are the descendants of stubborn pastoral Protestants who fought France's last war of religion. Three centuries ago this month, King Louis XIV revoked the Edict of Nantes, which had provided religious toleration in Catholic France. In response, the peasants of the Cèvennes waged a guerrilla war, keeping royal armies at bay for three years.

A quest for traces of the epic Cevennes produced a travel classic by Robert Louis Stevenson, who spent 12 days trekking through the mountains in 1878 and the next year published portions of his journal of the trip as "Travels with a Donkey in the Cevennes." Stevenson, who had been troubled by brushes with intolerance in his native Scotland, was fascinated by tales of the religious fanaticism that led to the Protestant revolt in Pont-de-Montvert, near Florac.

The head and forefront of the [royal] persecution. François de Langlade du Chayla, was a conscientious person, who seems to have been intended by nature to be a pirate. A missionary in his youth in China, he there suffered martyrdom, was left for dead, and only brought back to life by the charity of a pariah. Having been a Christian martyr, Du Chayla became a Christian per-

Protestant peasants, led by "Spirit Séguier, as his companions called him - a wool-carder, tall, black-faced and toothless, but a man full of prophecy," attacked du Chayla's house, overwhelmed his soldiers and captured du Chayla. Dragged into the main square, he was ritually stabbed to death by Seguier and each of his followers. Citing tortured relatives, "each gave his blow and a reason, then all kneeled and sang psalms around the body till the dawn. . . Tis a wild night's work . . . and it

seems as if a psalm must always have a sound of threatening in that town upon the Tarn." Some stretch of the Tarn should be visited by boat. A little river tour near Malène in flat-bottomed boat manned by local oarsmen reveals a mysterious cliff formation in its looming beauty. More and more visitors, however, are taking to the light, supple fiber-glass canoes available all along the river.

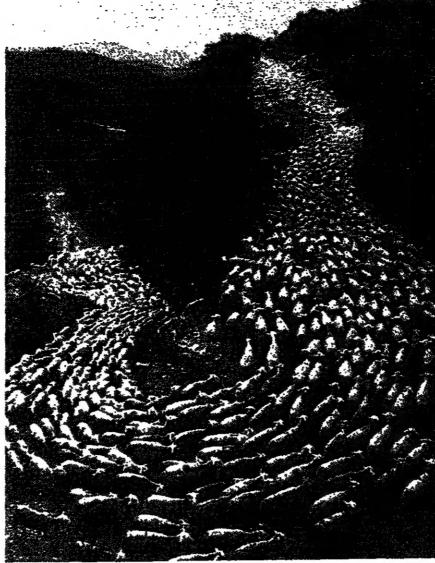

Canoeing the Tarn gorge, with its little rapids, is usually scarcely more dangerous or harder than punting at Oxford, though in early spring the swollen, ice-cold river can swirt unwary tourists into underwater caves in its banks and fatally pin them there.

We started one afternoon just outside Florac and paddled downstream for lour hours - an easy, scenic trip, on transparent mountain water, through tame wilderness. Motorboats are banned, so the journey is constantly inviting for a swim or picnic. We chose a sunny day, on the advice of Freda White, whose 1952 book "Three Rivers of France" is an indispensable companion to Stevenson's journal (and was reissued in paperback last year by Faber and Faber). As White promised, "Under the sun, the rocks show their colors of red, red ochre, amber, blue and gray. Without light they dim."

Y EVENNES meals fit outdoors appetites. Knowledgable friends sent us to one of several local inns whose fare is partly supplied by poachers operating in the Cevennes National Park. It was an unpre-possessing roadside establishment near Maène, the only public hint of its specialties being a cryptic phrase on its sign: "augmented menu on request." That evening the "augmentation" was brook trout, which restai rants are not allowed to sell in France. Local officials who eat there (and act as protectors)

eport autumn feasts of game. Tourist offices in Florac or Alès will provide schedules for the Cevennes's increasingy popular winter attraction; cross-country ski treks that take small parties for several days across the Causses, a huge plateau divided by river canyons. Occasional mins of castle outposts are a reminder that this barren country was never able to support a town. On special short skies, led by an expe-rienced guide, reasonably fit novice skiers can manage these treks.

For hikers or bikers, a detailed 187-kilometer route through the Cevennes, including a good map, may be found in Adam Nicolson's 1983 "Elf Book of Long Walks in

In the hills of the Cevennes, sheep are still driven on the hoof.

From May to mid-October, a favorite ho-tel in the Cèvennes is the Château de la Caze, a 15th-century castle in a bend of the Tarn. Just outside Malène, it is well situated for excursions on the gorge or over the deserted Causses. On a terrace overlooking the river, Madame Roux and her daughter serve elaborate versions of the region's cuisine and a memorable selection of bleu des Causses, sheep's-milk cheese fresh enough to wipe out most memories of its better-known neighbor. Roquefort. Rooms range from 330 francs (\$42) to 400 francs (\$50).

The best gateway to the Cevennes is Nimes, so most visitors pass near Anduze, the Cevennes village where France's oldest pottery operates. The Anduze potters' big urus are still made to the design brought from Italy by Catherine de Médicis and

originally used for the orangerie in Versailles. Inexpensive, for handmade urns (less than \$75 for the largest), they take years to weather to the soft reddish hues for which they are renowned - and there is a yearlong waiting list for the largest size. But the Anduze potters refuse to step up their production: "People always seem to be in such a hurry," said one, describing what he judged to be the extravagance of flying a dozen urns to the United States. Pressed about the story, he produced the order form - from Bloomingdale's. "They wanted us to start exporting them," he said, adding that the potters had turned them down: "If you export, you have to mark 'Made in France,' and it would be silly for us to make a change like that after doing pots the same way in the same place for 350 years."

## A Festival of Peppers In the Basque Country

else in France, the garlands of fiery red peppers would look out of place. But here, in a Basque village too small to rate its own postal code, strings of peppers are perfectly at home, drying outside whitewashed farmhouses, decorating restaurant hearths and butcher shop win-

#### PATRICIA WELLS

dows, even serving as the subject of an annual festival the last Sunday of October.

All over the Pays Basque, the piment d'E-spelette shows up fresh as well as dried, green as well as red. It is ground and chopped. pickled and stuffed, appearing in just about every dish that will take bold seasoning.

Young and barely piquant green peppers go fresh and whole into omelets or are chopped to season the vegetable and egg mixture known as piperade. A mild red Span-ish variety is filled with a smooth salt-cod mixture and baked. The traditional hot red pepper, dried and ground, is used as liberally

as ground black peoper anywhere else.

The piment d'Espelette is slender, three to four inches long (7.5 to 10 centimeters) and hot, but not ultra-hot. Rather, it is a marvelously elegant chili peoper with a rich, almost sweet piquancy, a heat that does not attack the three three transfers. the throat or the back of the palate but offers a pleasant, lingering tingling on the middle of the palate and the tongue.

Hot peppers have been growing in the Pays Basque since the days of the Conquistadors, perhaps even since Columbus introduced hot peppers to Europe. Although the hazy, humid climate is hardly suited to the tropics-loving plant, piment has played such an important role in Basque culture that farmers have managed to breed more than a dozen varieties that thrive here.

In one famous Basque preparation, jam-bon de Bayonne, the dried, ground pepper serves two purposes: Rubbed into the bone of the ham as it cures, the pepper acts as a preservative. When rubbed on the exterior, the rosy red color gives the ham a festive look, and adds, if only slightly, to the final flavor of the sliced meat.

Some scientists suggest that the reason people like hot peppers is that, in response to a burning tongue, the brain secretes endor-phins, a natural opiate, providing the pleas-ant emphoria that can follow a spicy meal. Whatever good feeling the chili provides,

its cultivation demands tremendous manpower, Until 1983 there was no organized Basque pepper industry. Individual farmers grew the peppers, dried and ground them for their own consumption, and sold any excess.

few years back, local restaurateurs and merchants noticed that fewer and fewer houses each September were decorated with the festoons of drying red peppers; fewer farmers were willing to devote the long hours to the harvesting, stringing, drying and grinding that generally kept the family occupied from early Septem-

To save the piment d'Espelette, farmers formed a cooperative called Biperra, Basque for piment, or hot pepper. It was through the cooperative that the dozen varieties developed by farmers were discovered, since every farmer saved his seeds from year to year.

"Out of those 12, we've selected out the four varieties we find the best," said Léon Darraldou commercial director of the cooperative. Now they are treating the pepper varieties the way winemakers treat different grape varieties — looking for the blend that produces a ground pepper that is complex and most typical of the region.

pickled whole in vinegar, even blended with tomatoes and other spices for a Basque Dec. 30-Jan. 10. A la carte, about 125 francs a person, including wine and service. No credit cards. This season, 50 farmers will supply the

SPELETTE, France — Anywhere piment d'Espelette is at the village's vineelse in France, the garlands of fiery covered restaurant. Euzkadi. In the long. family-style dining room of a traditional Basque house in the center of the village, Andre Darraldou (Leon's brother) serves a memorable piperade au jambon (here a spicy memoration of garlic, onions, chili peppers, tomatoes and scrambled eggs), fresh pepper omelets, and tripoxa, an unusual veal boundin, or blood sausage, served with a mildly:

spicy dark tomato sauce.

The most typical dish of the village is called axoa, a preparation of ground yeal, onions and fresh chilis, seasoned further:

with ground piment d'Esplette.

During the fall and winter the specialty to.

try is salmis de palombes, a dense, full-flavored stew prepared with local wild pigeon, red wine and vegetables. This is a mild dish; good for those who are not fond of strong. gamey flavors.

Euzkadi's daily specials include Satura day's saucisse confue au chou and Sunday's saucisse confue au chou and Sunday's pot au feu grand mere. Wine choices range from the local Irouleguy (not a very interesting wine) to the more substantial Spanish Rioja. All the Biperra cooperative's products can be purchased at the restaurant to take home. (A selection of Biperra products can be found in Paris at Fauchon, 26 Place de la Madeleine, and at the Comptoir Alimentaire. Landais et Basco-Bearnais, 52 Rue Montmartre.) For details on this year's Fete du Piment d'Espelette. Oct. 27, contact the co-operative. Tel: (59) 29.87.57.

HAT may well be the finest pepper omelet in France is found in Bayonne at one of the region's most authentic and charming bistros, Euskalduna, which is Basque for "Basque." This is not only a friendly, relaxed place but a pretty one as well: Blue and white ginghamchecked curtains and tablecloths give it a homey air, as do the copper pots, old Ricard carales and local posters. From the dining room you can sneak a look at the activity in

The restaurant is run by the friendly and outgoing Arroxa Aguirre. At first sight you may think she's a neophyte in the kitchen, until you find out that this 32-year-old has been at it since she was 13, when her mother, Geneviève Muruamendiaraz, tended the

Caim and serious, she runs the small restaurant almost single-handedly, up early: each morning to prepare pastries and get-most of the dishes going. She turns the stove over to a single assistant during serving hours and tends the tables herself.

The pepper omelet — delicious not only-for its fresh, mild green piments but for its incredibly fresh eggs — is served from June through October, when the green peppers are replaced by salt cod or fresh cepes. During other times of the year, the eggs are mixed with potatoes or fresh onions and cooked just until set, with a nice, slightly

runny interior. Other dishes to try at Euskalduna include fresh white tuna from Saint-Jean-de-Luz smothered in soft, sweet onions cooked with a souch of vinegar and topped with more of those fabulous green peppers; and chipirons a l'encre, tooth-tender squid sliced into loops and cooked long and slow in the black squid ink. The farm-fresh sheep's cheese, a brebis from nearby Briscous, makes a happy marriage with the local red house wine.

Euzkadi, Rue Principale, Espelette, 64250 Cambo-les-Bains. Tel: (59) 29-91-88. Closed Monday, Tuesday, and two weeks at the end of February: Memus at 50, 80, 100 and 115 francs, including service but not wine. A la carte, about 150 francs a person, including wine and service. No credit cards.

#### fits the action very well suite form for the Nonesuch record.

Minimalist Aesthetic Continued from page 7

Since the mid-1970s, Glass' major works have been his operas, including "Einstein." In between, he composes all manner of lesser efforts, some striking and others rather too obviously trivial and formulaic (for example, "The Olympian — Lighting of the Torch." his corny anthem for the opening Olympic ceremonies, on the Columbia album "The Official Music of the XXIII Olympiad Los Angeles 1984."). "Mishima," by and large, is one of his better pieces of such incidental music. There is some real color and drama to be heard, and the performances — again overseen by Munkacsi and Riesman, with the Kronos Quartet playing the string-quartet portions -

If the "Satyagraha" set makes that score sound worse than it should, the new Nonesuch recording of Reich's "Desert Music" portrays the music in a more sympathetic light than the live performance at the Brooklyn Academy last year. The performers for the concerts and the recording were the same, with Michael Tilson Thomas conducting a chorus and members of the Brooklyn Philharmonic.

"The Desert Music" is an ambitious choral setting of poems

minimalist aesthetic and its mystical underpinnings. Last year, the score sounded like a slightly stale rehash of many of the musical devices (mannerisms?) Reich had conjured up over the previous decade. But on this record there is so much real beauty (the feathery, floating string passages, for instance), and the choral passages seem so much better integrated into the context of the whole, that the piece sounds genuinely important.

The real minimalist pioneer was Riley, whose "In C" of 1964 - a piece in which Reich had a hand - defined the idea of a motorically kinetic, subtly shifting tapestry of sound.

Since then, Riley's career has not developed as flamboyantly as those of Reich and Glass. Mostly this is because he retreated for many years into the study of classical Indian music, a study that had serious religious overtones.

Recently, however, he has begun to emerge on records again with music that suggests a real effort to reclaim his status as a Western composer while incorporating his absorption in Eastern music. The Kronos Quartet has issued a two-LP Riley album on Gramavision-Gravity, " 'Cadenza on the Night Plain' and Other String Quartets," and the West German Kuckuck Prophets." The string-quartet album has a somewhat stiff quali-ty, as if Riley's inspiration, which he is accustomed to spinning out in fluid solo keyboard improvisations, was constrained by the academic formality of the medium. But there is a real charm to these pieces and the Kronos musicians play them beautifully.

The Kuckuck record combines purling synthesizer playing from Riley (the album title, for all its transcendent overtone also refers to Riley's Prophet 5 synthesizers) with English lyrics sung by the composer in a soft, slightly husky baritone. The texts are elliptical and spacey, and the music is full of the melismatic ornamentation and gentle glow of the slow introductory portion of an Indian raga exposition. Yet the textures of the sizers, while recalling the harmonium familiar in some Indian music, have a distinctly Western flavor, as well.

This may not be a Western compositional statement of the magnitude to which Glass and Reich aspire in their major scores. But as an honest and unassuming personal example of the fusion of India and the West, it speaks from the same impulses as "Saryagraha" and has much to offer.

#### FOR FUN AND PROFIT

# Start Your Own Agency

by Roger Collis

OW can a company cut its travel costs about 10 percent, get better travel service and make a pretax. profit of 5 percent or more on every travel dollar it spends? By going into the travel business - not by going it alone (this can be costly and hazardous for a company that lacks expertise and clout in a jungle of airline deals and bulk discounts) but by forming a joint venture with an established travel agency that will manage and staff an agency on the company's premises, dedicated to its specific travel needs, in return for 50 percent of the profit.

So far, 20 companies, including banks, advertising agencies, multinational trading and construction firms and a Fleet Street newspaper, The Daily Telegraph, are doing just this through a novel program called the Phoenix Travel Parmership, marketed by a London-based group, Phoenix Travel.

A company with an annual travel budget of at least £300,000 (\$420,000) enters into a partnership with the holding company of Phoenix Travel. A new travel agency is formed with a paid-up share capital of £20,000, the minimum required for recognition by the International Air Transport Association. Each partner holds 50 percent of the equity. The board consists of executives from both sides. The manager and staff are appointed and trained by Phoenix Premises, usually in the company's building, are rented to the joint venture. The agency may work exclusively as an in-house travel department or solicit business from outside. For example, The Deith Tallerner of the property of the prop ple, The Daily Telegraph, to its surprise and delight, has built up an agency with annual sales of more than £1 million, only 20 percent of which is for the newspaper.

Phoenix is a privately held company with revenue of £30 million (75 percent of this in joint ventures) and pretax profit of about 4 percent. Profit at some of the joint ventures is as high as 10 percent. Michael Lancaster, Phoenix's chairman, said the program was so successful that "group profit per £1,000 of turnover is higher than any of the multiples," or major travel agencies, such as Hogg Robinson, Lunn Poly and American Express — the last of which, Lancaster claimed, is losing money on its travel services.

Competition in the business-travel market has become so intense that travel agents woo corporate customers with promises of cost savings, improved services, management information reports and discounts on air fares and hotels. Most agents give extended credit to corporate customers — for instance, 45 to 60 days — even though the agents have to pay the airlines by the 15th of the following month. Agents routinely give customers rebates on their normal 9-percent commission: 2 to 3 percent is usual, 6 to 7 percent not uncommon. Consequently, agents may be earning as little as 1 to 2 percent on turnover.

The problem is that, however high a dis-

count you get, you can never be sure the agent is choosing the most economic way to go. Agents earn "override" commissions on some airlines and routes, which can be as high 40 percent. Apart from not passing these on to you, they may be biased in sending someone on a direct flight from London to Dar es Salaam instead of a less

expensive routing through Geneva.
Iqbal Meer, general counsel of ITM, a \$500-million trading conglomerate that has joint ventures with Phoenix in London and New York, said it was also a question of commitment. "If I went to the travel agent down the road with 12 destinations in Africa and asked him to let me have the most costeffective itinerary for routing one of our executives, he will probably have to spend half a day to work it out. Now, whether he's prepared to do that service for the ticket he's going to sell me, I have my doubts."

hand, have every incentive for saving money and providing the best possible service, because they serve two masters. "We have an organization within the organization which

we can control," Meer said. A director of a major international advertising agency that formed a joint venture with Phoenix three years ago said: "What started off as a way of tidying up our administration by putting all our travel together in the building and getting a better service has been developed into something that is giving a real financial return. Last year we saved £25,000 to £30,000 on our travel bill — that's about 12 percent - and made 10 percent on pretax profits. We are now thinking of the joint venture as part of our mainstream busi-

Harbourne Stephen, managing director of The Daily Telegraph, is thinking along simi-lar lines. His joint venture, with its turnover

#### Some travel ventures are providing a real financial return.

of £1 million, has pretax profit of 6 to 7 percent. He believes turnover could grow to £1.5 million without adding staff.

All of Phoenix's joint ventures benefit from the override commissions and bulk discounts negotiated by the group. "We hide nothing," Lancaster said. The benefit to Phoenix is shared costs and the ability to open new ventures without capital risk. The parent company has virtually no overdraft, as a condition for the partners is that they settle invoices by the 12th of the month Typically, the company's computer is direct-ly linked with that of its joint venture.

Lancaster said a major advantage of the program for American companies is that it provides a way to circumvent U.S. regulations preventing an organization from owning a travel company unless the corpora-tion's travel business is less than one third of the travel company's turnover. This rule does not apply if an overseas subsidiary forms a travel joint venture and sets up an office in New York, as ITM and at least one major bank have done. Another advantage of having a joint venture in New York and London is that the two offices can work out the best way to ticket international travel.

Some joint venture partners use their travel agencies as a means to transfer, money from countries with stringent exchange control regulations. This can be done by prepaid ticketing and other more arcane methods that Phoenix is reluctant to talk about. Some companies use their share of the profits to give untaxed travel benefits to executives. And all employees of joint venture partners get a 5-percent discount on vacation pack-

There is one perk in particular that may tempt the most skeptical company into run-ning its own travel agency: As a director, an executive qualifies for agency staff rebates on air tickets, car rentals and hotel rooms. For example, each of IATA's 60 arrines allocates two tickets a year at a 75-percent discount to each accredited sales office. Non-IATA airlines may be even more generous. And many carriers offer free tickets as promotions and rewards for a certain volume of business. This means that even the most peripatetic executive can enjoy virtually free travel anywhere in the world.

### David Hare Continued from page 7

theater is under attack from a right-wing government. Let us, therefore, use the National Theatre to attack that government from a nationalized stage."

With prospering careers as playwight, di-rector and filmmaker, Hare is peripatetic. He spent the summer on the run between London and New York, redirecting the production of "Pravda" at the National, directing "A Map of the World" in New York, preparing for the opening of the movies "Wetherby" and "Plenty" and finding time to take his three children camping in France.

Redirecting "Pravda," Hare led his actors through small alterations in dialogue, occasionally acting out a sequence and belying his professed lack of ability for performing. His directorial approach was confidential rather than autocratic, yet there was never a question about who was in charge.

UNITED STATE

# 2 - 1 N - 1 18.

In New York, rehearsals of "A Map of the World" were demanding. The production is physically complex and there was the additional difficulty of getting the American actors adjusted to unfamiliar political material and a fragmented, cinematic style of story-

One day, rehearsing at the Public Theater, Hare - dressed in his customary jeans and sneakers, shirtsleeves rolled up -- stood in the orchestra and led his actors slowly through their paces, worrying less about the lines than about stagecraft. At one point, he told Elizabeth McGovern, who has a leading role, that he wanted her not to be naturalistic but to be in a state of "animated suspension." Both the director and the actress smiled at that. How do you play "animated

With "Map of the World" opening, he can now concentrate on other matters, beginning with his next movie, "The Butter Mountain, to be filmed in France. In his previous work, women have generally acted as a kind of moral conscience. "The Butter Mountain," he said, will center around a woman who Hare called "absolutely devoid of redeeming qualities." Let Philip Roth make of that what he will

Reflecting on his youth, Hare said: "I used to go to the dry dock when my father's ship was being overhauled. I loved those ships." He described what he called the "lower life" below deck, and the elegance above. "As purser, my father had a nightly cocktail party. You still dressed for dinner on ships in the 1960s."

Years later, in Australia, Hare visited Sydney Harbor. He recalled: "I was sitting at the wharf by a window in a Chinese restaurant. It was 9 o'clock at night and suddenly my father's old ship, the S.S. Oriana, came into the harbor and it moved right past the window. Its lights were on, and it was just the most beantiful sight. It was very, very ro-mantic." His eyes seem to light up at the memory. "Those ships," he said, "were is-lands of timelessness."

Beneath the apparent contradictions of Hare, and beyond the political conscious-ness, is an idealistic yearning for improvement, in his own work, in the theater, in Britain. The impulse is almost visionary.
One feels that he is dreaming of the "days and days and days" to come. and days and days" to come.

#### TRAVEL

## To Save Money on Travel, | Connecticut's Small Shoreline Towns

by Nancy Jenkins

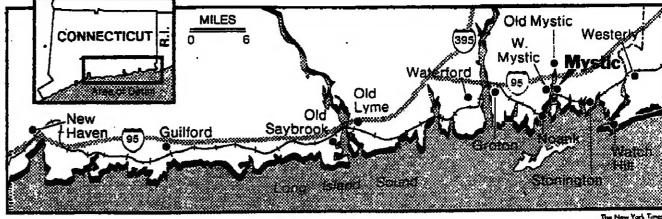

ONNECTICUT may officially be part of New England, but there are vast stretches from the New York border eastward that look suspiciously like suburbs of New York City. Not until you get beyond New Haven does New England really begin. There the population starts to thin out, the urban sprawl swings north toward Hartford and the shoreline's towns and villages begin to take on that air of huddled concentration around a harbor, a river, a white-painted steeple that spells New England in earnest.

With easy access from New York --- by car along Interstate 95 or on Amtrak's Bostonbound trains, many of which make stops on the shoreline - these quietly bustling, handsome little towns have a special appeal. They are full of interest and even a certain easygoing, rusticated kind of sophistication.

Guilford, Saybrook, Lyme and Old Lyme, Waterford, Groton and Stonington — the towns along this stretch of the Connecticut shore have their origins largely in the mid-17th century, when disgruntled and adventurous offshoots of the colony of Massachu-setts Bay Puritans threaded their way down the winding rivers and along the deeply in-dented shoreline south of Cape Cod. From their earliest beginnings, these were towns that made their living from the sea — fishing, coastal trading and, for a brief but glorious period, whaling. Shipbuilding was the most important industry, the one that made all the

The towns still focus on the sea but today are apt to be geared toward recreation. While Stonington is still a commercial fishing port of some importance, and the old shipbuilding tradition is maintained at General Dynamics' Electric Boat Division in Groton, this kind of enterprise is limited. Yacht clubs and sailboat refurbishers are more common than the old shipyards, and ship's chandlers, ropewalks and sail lofts have been replaced by hotels, restaurants, gift shops and the inevitable condominiums.

Of all the towns along the shore, none was more important in its mid-19th-century hey-day than Mystic. The town's chief chronicler, Carl C. Cutler, a founder of the Mystic Seaport Museum, said this little town, hardly more than a village, produced "more noted captains, a greater tonnage of fine ships and larger number of important sailing records than any place of its size in the world." Cutler estimated that more than 1,000 ves-

sels, from 30-ton sloops to the 1,679-ton Cape Horn clipper David Crockett, had been built along the banks of the Mystic River over a century and a half - an astonishing record for a town whose population rarely exceeded 1,500.

Much of Mystic's appeal is as a center from which to explore the surrounding seashore and the hills that rise behind the shore. Along with the broad stretches of sandy beachfront, there are nature preserves with well-marked trails, vineyards, cider mills, and other, almost equally charming towns and villages within easy reach. Fishing boats and sailboats can be hired for daylong and half-day excursions.

The star attraction is Mystic Seaport Museum, a monument not just to the past of a Yankee whaling and shipbuilding town but to the maritime history of the United States. Begun in 1929 as a local marine historical association, the museum is not, as popularly believed, a re-creation of the 19th-century town of Mystic. Drawn from many sources. it is intended to be an idealized New England seaport.

On the nearly 40-acre (16-hectare) site of the George Greenman shipyard, one of the largest shipbuilding outfits in Connecticut in the mid-19th century, the museum has 60 buildings, including houses, shops, industrial and commercial buildings, even the tiny Fishtown Chapel. It also has about 300 historic craft, including the Charles W. Morgan, the last of the great Yankee whaling ships, built near New Bedford in 1841; the Joseph Conrad, a Danish-built, squarerigged training vessel; and the L.A. Dunton, a Banks fishing schooner built in Essex, Massachusetts, in 1921.

At this time of year, the crowds begin to thin and it becomes easier to glimpse what life must have been like in a town like Mystic 150 years ago. Much of the re-created town works: At the print shop, the Liberty clam-shell platen press, built in 1880, prints documents for the museum; the shipsmith makes ironwork for rigging the seaport's vessels; at the Preservation Shipyard most of the constant work of restoring and refurbishing goes

on in full view of the visitor. The museum library is a valuable resource for researchers and students of maritime history as well as for genealogists tracing a family connection to New England. The Morris and Stanley Rosenfeld collection of historic ship and yachting photographs, a recent acquisition, should also be of great interest once it is cataloged and displayed.

S rivers go, the Mystic is short. It rises A in a marsh of sedge and cattails, curves under the interstate, broadens in a smooth-flowing are that divides the towns of Groton and Stonington, narrows again to sweep under the Mystic drawbridge, then courses down to the sea at Noank, about five miles (eight kilometers) from where it began. In good weather, the road to Noank — State Route 215 south from West Mystic — makes a splendid bicycle tour, with plenty of downhill runs to complement the occasional uphill struggle.

Mystic offers other attractions. Gravel, Clift and High Streets, lined with early- and mid-19th century homes of seamen, shipbuilders and whaling captains, climbing the hill to the imposing Union Baptist Church, provide a pleasant hour's walk. Farther afield, the Denison homestead, another his-

toric house, is next to the Denison Pequotsepos Nature Center, a 125-acre natural sancmary with a number of trails, including one laid out for the blind, complete with braille notices. There are beaches at Noank and at adjacent Groton Long Point. Five miles from Mystic along highway

U.S. 1 is Stonington, which for all its atmosphere of literary and artistic gentility is home port for Connecticut's only remaining commercial fishing fleet. A good place to begin a walking tour of Stonington is at the far end of Water Street, where the Old Lighthouse Museum, an octagonal tower and granite building, houses the collection of the Stonington Historical Society.

Stonington's houses are, if anything, better preserved, more numerous and of greater interest than Mystic's, and a stroll along Water and Main Streets is a pleasant way to occupy an hour or two. There are lots of gambrel roofs, lots of Greek Revival details and a certain amount of Tara-like pomposity. Like Nantucket, Edgartown and the old parts of Newport, which it much resembles. Stonington has streets lined with rather large houses set closely together and crowding out to the edges of their lots. The closeness of it all presents a sense that everything is well

Touring vineyards may not be an activity usually associated with the Connecticut hore, but the Clarke Vineyard (tel. 203-535-0235) on Taugwonk Road, just north of Mystic, is a commercial vineyard (chardonnay, pinot noir, riesling, seyval) that welcomes visitors until about the middle of October, when volunteers are needed to help with the grape harvest.

@ 1985 The New York Times

### Erich von Stroheim Anniversary Continued from page 7

Stroheim had to direct "The Merry Widow," starring Mae Murray and John Gilbert. He revised the operetta libretto into a romantic melodrama that delighted gushing fans but had sardonic touches that pleased spectators of intelligence. Its success helped secure the future of MGM.

Pat Powers, an independent producer who was an old friend and admirer of Stroheim, now asked the director is do a film for his organization. Stroheim had in mind a story about Alt Wien starring himself as an Austrian prince forced to marry for money despite his love for a girl of the people. In essence it was a variation on "Old Heidel-berg," but in its treatment "The Wedding March" was a study of a great empire in

Again rebuilding Vienna, Stroheim had 37 magnificent sets constructed, reproducing St. Stephan's cathedral, the Hofburg palace and the Graben avenue. After "The Wedding March" had been before the cameras seven months, Powers grew worried and sold his holding to Paramount. The first half of the film has startling strength and pictorial splendor, but the second half was mangled by clumsy editing into a separate film and Stroheim forbade its showing in the United States. Seen abroad as "The Honeymoon," it was lost when the only known copy was burned in 1957 in a fire at the Cinemathèque in Paris.

"Queen Kelly," begun in 1928, had been conceived as a silent film. When talking pictures seemed certain to replace the silents, Kennedy halted production. This action, it proved, terminated Stroheim's career as diector. He was engaged by Fox to direct a talkie, "Walking Down Broadway," but un-comprehending executives withheld it from distribution and subsequently destroyed it. Stroheim was deemed a dangerous financial risk and he was reduced to acting under the direction of lesser men.

In 1936 he was rescued from oblivion by a call to act in a French film. His sympathetic performance as the German prison camp commander in Jean Renoir's "La Grande Illusion" restored him to stardom, and he was much in demand.

Though none of the major films Strobeim directed can be seen as he constructed them, all exude a compelling force. As a paragraph by a great writer can disclose his style, so these remarkable films reveal a distictive creator. His methods warrant examination.

Frank Capra tells in his autobiography of his disappointment when as a message boy he watched Stroheim shooting a short scene for "Greed" that Capra concluded he could have got through in a jiffy. Certainly he might have registered the scene quickly, but to what effect? He mentions the endless retakes in work that took most of the night, the players on the verge of revolt as they were stung by bullying commands - all for a simple scene in an office, concerning a violent dispute between two men. But what went into the scene lent it a power that survives.

Stroheim cast a spell over his co-workers,

as a journalist who visited another "Greed" location testified. The company was about to rehearse a scene in the tenement house where the dim-witted dentist, McTeague, lives with his wistful wife. Tring, who hordes the money she has won in a lottery as the two sink into poverty. Everyone connected with the

production spoke of McTeague and Trina as people might of neighbors, gossiping about their traits and habits. Here is the seed of the magic that made these characters real to audiences. The art of Stroheim was not so much matter-of-fact realism as form of di-

"An artist of genius is one who creates without imitating, and who draws out of the depths of his own being the least predictable part of his work," Rene Clair once wrote. "How many in the history of the cinema fit this definition? Whatever their number, Erich von Stroheim is at their head."

### **Shares Close Mixed in New York**

61,709,330

Unuted Press International
NEW YORK — Share prices finished mixed in active trading on the New York Stock Exchange on Thursday after failing to muster an afternoon rally.

The Dow Jones industrial average fell 0.56 to 1,333.11. Among the 1,980 issues traded, advances out-paced declines 783-717.

Volume totaled 127,540,000 shares compared with 147,330,000 on Wednesday.

Traders said stronger-than-expected late September car sales reports and President Ronald

Reagan's assertion in Ohio that his tax plan would pass in this session of Congress helped lift the market in midafternoon trading. But Trude Latimer of Evans & Co. said the predominant sentiment turned out to be disappointment that the market could not follow through on Tuesday's advance. She said the culprit for that failure Wednesday was the battering hospital management stocks received on news that hospital utilization rates were still declining. But Revion Inc. was to blame on

Thursday, she said. "Thursday's culprit was Revlon," Ms. Lati-mer added. "The houest sector is the rumor stocks and one of the most active and high-

profile of that group has been Revlon."
In late activity, Revlon requested a trading halt pending an announcement to be made after the market closed. Expectations that the cosmetics and health care concern was about to announce a leveraged buyout cooled the activity in Revion, Ms. Latimer said. That trend spread to other rumor stocks and to some blue chip and computer related stocks that had started to improve, she said.

#### M-1 Falls \$400 Million

The Associated Press NEW YORK — The basic U.S. money supply measurement, M-1, fell \$400 million in late September, the Federal Reserve Board said Thursday, The decline had been anticipated.

I nursday. In e decime had been anticipated.

M-I, which represents funds readily available for spending, comprises cash in circulation, deposits in checking accounts and non-bank travelers checks. The aggregate still remains well above the upper limits of the growth targets set by the Fed in its attempt to stimulate the economy without reviving inflation.

After the market closed, Revion said it would be acquired by Forstmann & Little Co. in a leveraged buyout. Revion has been trying to counter a hostile takeover bid from Pantry

Reviou declined % to 54.

Traders said confusion and concern characterize the market outside of the takeover spotlight. "Everybody's earnings are coming in weaker than expected and even though some of this has been discounted by the market already, the market reacts negatively when the earnings are actually announced," said Peter Feinman, a partner and block trader for Montgomery Secu-

"Since then, investors have been receiving very disappointing news on corporate earnings, the factor that really drives the stock market,"

### Electronic Imaging Is Seen Having Revolutionary Role

By DAVID E. SANGER

New York Times Service

EW YORK - At the Smithsonian Institution's cav-EW YORK — At the Smithsonian Institution's cavernous National Air and Space Museum, many of Orville and Wilbur Wright's aircraft drawings are crumbling. So are thousands of other brittle design sketches from the early days of flight, kept in a warehouse, a few miles from the museum floor where throngs of visitors each day gaze at the Kitty Hawk and the Apollo-11 space capsule.

Soon, however, Smithsonian officials hope those drawings will be at the fingertips of anyone with an International Business

be at the fingertips of anyone with an International Business Machines Corp.-compatible personal computer. Using a mix of commercial equipment and software of their own design, archivisis have begun to scan thou-

It is now possible

to merge text and

drawings on a PC

relatively cheaply.

sands of drawings, documents and photographs electronically, digitizing the images and storing them on magnetic and optical disks

What's remarkable is that this is more than just a storage and retrieval system," said Robert L. Martella, who is

6 Acres

working on the project at the museum. "People will actually be able to tinker with the designs on their screens," toying perhaps with different wing designs for the Spirit of St. Louis, or dropping the images into books and reports."

Electronic imaging has been around for a while, but until recently it has been possible only on very costly computer systems that only the biggest architectural companies, aerospace designers or auto manufacturers could afford. Now, however, a bost of products are coming to market that make it possible to merge text, photographs and drawings on ordinary personal computers, often for a few hundred or a few thousand dollars. The result, many believe, could be revolutionary, both for the publishing industry and for office workers.

Not surprisingly, more than 90 percent of the data fed into personal computers is alphanumeric — text or numbers. But entering a ream of data already printed on paper is laborious. Thus, most of the scanners available for personal computers are contical character recognition desires. optical character recognition devices, essentially small cameras that run over a page of text, detect light from dark, then try to discern the distinctive shape of each typewritten character.

NE BY ONE, the scanner translates those shapes into a signal sent to the computer, one that from the microprocessor's perspective looks identical to the signal received when a typist presses a key on the keyboard.

Pictures and drawings, however, must be handled differently. Because they can take on an infinite number of shapes and shades, they cannot be "recognized" by the computer. So image processors partition the picture into thousands of pieces, like the tiny dots that make up a newspaper photograph. Those dots are detected by a light-sensitive semiconductor, which translates them in digital form to the computer. Later, the image can be reassembled dot by dot.

Storing the data and making it useful, however, are two-different things. "What's new for personal computers is the application software that parses the images, interprets them, and merges them, with the text," said Rolando Esteverena, president of Datacopy Corp., a Mountain View, California, company that markets a \$4,000 scanning device for a variety of personal

The application software can identify each image, and associate it with a text file. Thus, a personnel file stored in a data-base program could display far more than just an employee's name, address, salary and employment history. It might also bear his picture, a replica of his signature, and perhaps even a fingerprint
— limited only by the resolution of the display screen.

But as manufacturers of the systems concede, photographs and drawings consume enormous amounts of memory. An 8½-by-11-inch (21.7-by-28.2-centimeter) photograph could contain from 4

### Agrees to Buyout \$3-Billion Pact

Revlon

With Forstmann

The Associated Press

NEW YORK - Reviou Inc., the cosmetics maker that has been fighting a takeover bid by Pantry Pride Inc., agreed Thursday to be acquired by Forstmann Little & Co., a private investment banking firm, for an indicated \$3 billion.

Revion's senior managers will participate in the Forstmann group, a joint announcement said.

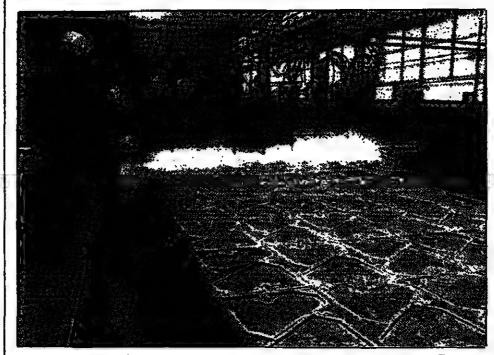

Trading in Revion stock was suspended on the New York Stock Exchange late Thursday after rising 37.5 cents to \$54.375. The stock jumped \$4 a share Wednesday after Revion disclosed that it was weighing several proposals as an alterna-tive to the Pantry Pride bid.

The agreement calls for Forstmann Little to pay \$56 cash for each of Revion's 28.3 million common shares outstanding, or \$1.58 billion. With Revion debt to be assumed or refinanced by Forstmann Little the total rate. mann Little, the total value of the transaction would be about \$3 billion, the companies said.

The accord stipulates that Rev-lon's worldwide beauty-products business be sold for \$900 million to a group led by Adler & Shaykin, another investment firm. In addi-tion, Revion's Norcliff Thayer health-products unit and its Reheis Chemical subsidiary is to be sold to American Home Products Corp. of New York for an undisclosed sum.

Forstmann Little said it planned to invest about \$445 million of its capital in the purchase of Revion, with the balance financed with bank loans. The purchase is subject to approval by Revion's shareholders and completion of the sale of the beauty-products unit.

Revion's decision to accept the Forstmann Little proposal came after it received a sweetened \$53-ashare offer from Pantry Pride. The latter, based in Fort Lauderdale, Florida, operates supermarkets and other retail stores.

### Forging Success in Steel, Sans Subsidy West Germany's Hoesch to Resume Dividend Payments

By Warren Getler

rnational Herald Tribune DORTMUND, West Germany - Hoesch Werke AG is a rare success story among Europe's struggling steelmakers. Being privately owned and profitable, however, has produced its own set of frustrations, not the least of which is coping with the foreign competition's unrelenting resort to gov-

One of the first European steel manufacturers to streamline operations, Hoesch has been able to produce steady, albeit modest, profits since 1982. Analysts at West German banks expect earnings per share at Hoesch to rise to as high as 20 Dentsche marks (\$7.47) from 13 DM in 1984, boosted significantly by Hoesch's position as a major supplier of steel sheet to the booming West German auto industry.

This year, the West German steel and engineer ing group will pay its first dividend since 1977,

expected by analysts to be 5 DM per share.
"The fact that we'll pay a dividend this year is evidence of the success of our restructuring efforts since 1980," said Hoesch's chairman, Detley K.

"We were almost bankrupt four to five years ago," he said. "After slashing raw steel production by 40 percent and laying-off half of our work force of 26,000, we are now one of two West German steel companies showing sufficient profit to pay

Mr. Rohwedder declined to project 1985 profit, but said sales would grow some 5 percent from last year's 7.25-billion DM. Hoesch posted a 1984 profit of 94-million DM, compared with 519-million DM in 1983 and 19-million DM in 1982.

Those figures, however, were distorted by ex-traordinary gains that included government subsi-dies and liquidation of reserves. A better reflection of the company's steady growth in earnings would be the operating profits of 21-million DM in 1982, 31-million DM in 1983 and 182-million in 1984,

Thyssen, Europe's largest steelmaker, has said it will pay a minimum dividend of 4 DM on the current year ended Sept. 30, ending a two-year gap. A privately-owned diversified steel and engineering group with sales nearly five times that of Hoesch, Thyssen returned to profit in the 1983-84 fiscal year, reporting world group net earnings of 181-million DM after a 550.2-million DM loss in

Klöckner-Werke, the third major West German steel producer set to return to profitability, said recently that it expects to show an operating profit for the current year ended Sept. 30 after breaking even last year. No dividend is expected.

Eckehardt Schubert, steel analyst at West-deutsche Landesbank Girozentrale in Düsseldorf, said he is cautiously optimistic about prospects for Hoesch and other privately owned West German steel makers on the comeback.

"In the short term, the prospects for Hoesch and others are quite favorable," he said. "Hoesch is reaping the benefits of its modernization efforts and its connection with the German auto industry, but the overall market in which they operate sim-

## **OPEC Talks Fail** To Find Accord On Quota Issue

By Bob Hagerty ternational Herald Tribune

failed Thursday to agree on how to share output among its 13 mem-

in Vienna was called because a ses- OPEC. sion in July failed to produce agreement on the issue.

eral other members are likely to continue surpassing their quotas.

Ecuador boycotted Thursday evening's meeting and said it may quit OPEC if other members continue to oppose a rise in its quota. The other ministers agreed to meet again Friday morning, but there appeared to be no further pressing business.

A temporary drop in Soviet and Iranian supplies has boosted prices in recent weeks, but many OPEC officials fear that prices will plunge early next year unless producers show more restraint.

At Thursday's meeting, Iran, the United Arab Emirates, Gabon and Qatar also formally asked for higher quotas. But the ministers generally believe that they cannot afford to raise OPEC's overall output ceiling of 16 million barrels a day without flooding the market, and no member was willing to reduce output to make room for others.

Participants said Kuwait, evidently seeking a compromise, as-serted that the requests of Iran and Iraq were most urgent. The two countries have been at war for five years, and recent bombing by Iraqi jets has wiped out a large part of

Iran's export capacity.
On Wednesday, Iran had opposed the idea of raising any member's quota, but the Iranians changed tactics Thursday morning and requested a larger quota for themselves, though they would be unable to use it at present. Ecuador's delegation, angered

that its request seemed to be receiving lower priority, protested by re-

fusing to attend the evening meet-ing Later, the delegation said that VIENNA — The Organization it planned to return home without of Petroleum Exporting Countries awaiting the formal end of this week's gathering.

"We need an extra quota for ers. peaceful purposes, not to sustain a Oil ministers deferred until a Dewar," said Fernando Santos Alvite, cember meeting further haggling head of Ecuador's delegation. If the on requests by some members for request is denied, he said, Ecuador higher quotas. This week's meeting would "reassess" its membership in

Ecuador is one of OPEC's smallment on the issue.

An Iraqi delegate said afterwards that his country would increase its output anyway, and several other members are likely to (Continued on Page 17, Col. 4)

#### U.S. Auto Sales In September Up 48%, to a Record

United Press Internation DETROIT - Buyer incentive programs offered by the nation's top-four automakers gave new-car dealers their best September ever as sales jumped 48.1 percent from levels of a

year ago.

Combined with import sales which reached 228,500 units, more than 1.06-million cars were sold, the first time more than a million cars were sold in a single month.

The seven companies -General Motors Corp., Ford Motor Co., Chrysler Corp., Honda Motor Corp., American Motors Corp., Volkswagen of America and Nissan Motor Manufacturing U.S.A. — reported combined sales of 839,382 cars in the United States during the latest month, compared with 566,672 cars a year ago.

The daily selling rate of 34,974 cars compares with 23,611 for the same period last year. The annual rate for the industry during the period was a strong 10.8 million cars, compared with 7,4 million last year.

The Secret of the Soaring Market

The great growth movements in stocks occur only after there has been meticulous engineering of what our researchers call thrust potential. The WORLD CAPITAL STOCK REPORT, our regular report to clients with high performance standards, will show you with graphs where the big drives are germinating – and will tell you in detail where laboratory breakthroughs are giving birth to the dynamic new industries which vastly out-perform market indices and lumped economic statistics.

identifying thrust potential is only part of what we can do for the aggressive investor - as you will learn after completing and returning the coupon.

Spain Backs Incentives To Aid Auto Industry

MADRID - Spain has approved a plan of financial incentives designed to stimulate some of the nation's old-established car manufacturers to modernize their plants, government sources said Thursday.

An official for a U.S. automaker said the restructuring was aimed at making the Spanish subsidiaries of French companies more compet-itive with the newer facilities of their U.S. rivals operating in Spain, such as Ford Motor Co. and General Motors Corp.

"The plan is aimed at the subsidiaries of

Peugeot and Renault. We have no restructuring program and do not require special funding. the officials said.

Government sources said commercial banks would be asked to provide funds for the scheme, with the manufacturers putting up 180 billion pesctas (\$1.12 billion). The state will make up the difference between the prime interest rate and the rate at which the banks lend money for

Over the last 10 years, Spain has given gener ous subsidies, tax and legislative breaks to en-able Ford and GM to set up assembly plants. French companies, such as Renault, Peugeot and Citroën, have operated in Spain since the 1960s but have aging facilities, swollen work forces and a wider production range.

#### Bell Group Unit Thought to Buy

SYDNEY - One of Robert Holmes à Court's companies in the Bell Group Ltd. is believed to have bought about 10 million Broken Hill Proprietary Co. shares at 8.50 dollars (\$6.07)

They said a Melbourne broker, Potter Partners, who represented Mr. Holmes à Court in the past, entered the market Wednesday with the buying or-der at 8.50 dollars, well above the market level at the time of \$04 dollars, but did not succeed before Thursday in putting the parcel together.

each on Thursday, brokers said.

Potter and Mr. Holmes à Court declined to comment on any purchase.

The brokers estimated such a purchase, if on behalf of the Bell Group, a multinational transport and communications concern, would lift its stake in BHP, the Australian energy group, to about 60 million shares, or nearly 6 percent of issued capital. Disclosure is not required under Australian securities rules until a stake has reached 10 percent.

There have been market rumors for many weeks that Mr. Holmes à Court plans a bid for 20 percent of BHP.

#### National Loss Underscores Industry's Slump

By Andrew Pollack New York Times Service

SAN FRANCISCO - Only days after its trade association predicted that business would soon improve, the semiconductor industry is demonstrating again this week the effects of a yearlong de-

National Semiconductor Corp. reported Wednesday a loss of \$53.5 million for its first fiscal quarter, the largest in its history and the worst so far in the industry's slump. The report followed announce-

ments earlier this week of austerity measures that included pay cuts by off 1,300 in the United States and intel Corp. and layoffs and salary reductions by the semiconductor operations of Motorola Inc. The industry that makes the sili-

con chips used in computers and other electronic equipment has been mired in a slump caused by persistent excess inventories, slowcompetition from Japan.

As for the outlook for a turnaround, "it's like waiting for Godot," said John J. Lazlo Jr., semiconductor industry analysi for Morgan Stanley & Co. "I don't look for any material improvement over the short term."

Charles E. Sporck, National Semiconductor's president and chief executive, appeared to agree in his statement Wednesday: "We have recently experienced a marginal improvement in semiconduc-

improvements in those rates, our six days during the Christmas seafinancial performance will contin- son. Motorola announced on Monue to suffer."

National's loss, which had been expected, compares with a profit of work force by 1,500 to 1,700. It also \$35.9 million, or 40 cents a share, in said that salaries would be reduced the first fiscal quarter of last year. 5 to 10 percent. Revenues in the 1985 quarter, which ended Sept. 22, plunged 20

National based in Santa Clara, California, also said it would close its operations for seven days during Christmas to save money. The company this year has already laid

percent, to \$423.4 million, from

others overseas. Analysts expect virtually all other semiconductor companies to report operating losses for the third calendar quarter and some to report losses for the fourth quarter as

National's loss is large because ing computer sales, and severe of its reliance on commodity products that have been affected most by price wars, and because of heavy expenditures on modernizing facilities. Third-quarter losses for companies such as Intel and Advanced Micro Devices might be offset by interest income or tax credits, while semiconductor losses for Texas instruments and Motorola might be counterbalanced by earnings from other operations

All the companies are all acting to reduce losses. Intel recently instituted pay cuts of 4 to 8 percent tor order rates," he said. "But until for its entire U.S. work force and we have a significant and sustained said it would shut its operations for

day a series of staff reductions designed to cut its semiconductor

Despite the glum news, however, some analysts and executives say the industry has begun a modest improvement that should pick up steam in 1986. The Semiconductor Industry Association predicted last week that worldwide semiconduc-

tor sales would increase by 18 per-

### Dollar Ends Sharply Lower in New York

Compiled by Our Staff From Dispatches
NEW YORK — The dollar closed sharply lower in New York on Thursday on signs of concerted

Reports that the Group of Five yen from 213.50 at the opening and have decided to further depress the 213.80 on Wednesday. Earlier in U.S. currency pressured the U.S. Tokyo, the dollar ended at 213.70 yen, down from 213.90 yen. on Thursday on signs of concerted intervention, dealers said.

veral traders said they believed that European and U.S. central banks sold a modest amount of dollars earlier in the day.

The dollar ended at 2.6200 Deutsche marks in New York, its lowest level in about 16 months, compared with 2.6520 on Wednesday.

Earlier in London, the U.S. unit ended at 2.6225 DM after drifting most of the day around its opening 2,6470 DM and a close on Wednesday at 2.6470 DM. In Frankfurt, the dollar was fixed at midafter-noon at 2.6459 DM, up from 2.6410 DM previously.

The Bundesbank sold \$29.3 million at the midday fix. West German dealers said this showed that the government was continuing its policy of maintaining a higher pro-file since the Group of Five nations' meeting last month.

THE STORIES OF MURIEL SPARK

314 pages. \$18.95. E. P. Dutton, ? Park Avenue, New York, N. Y. 10016.

By Michiko Kakutani

TREATED the story," says the narra-tor of one of Muriel Spark's recent nov-els, "with a light and heartless hand, as is my way when I have to give a perfectly serious account of things." It is of course a good description of Spark's adamantine style, and nowhere is that style more in evidence than in these collected stories. Indeed, the tales serve as a kind of magnifying glass, beightening the distinctive qualities of Spark's work: her cool, precise prose; her tricky, tricked-up plots; and her wicked, peremptory sense of humor. The weaknesses of her fiction, too, are thrown into relief here — we notice, more acutely, her willful tendency to withhold information, her willful tendency to withhold information, her reliance on arbitrary, neatly symbolic endings and her reticence to involve us emotionally in the lives of her people.

A convert to Catholicism, Spark has always

displayed a sharp moral sense and a fierce Olympian detachment in her fiction; the reader often has the sense that Spark is standing far away, looking down on her characters' mortal follies from a great distance as she mischievously twitches the strings of their destinies and moves them about with the same aplomb with which they attempt to manipulate one another through blackmail, deception and be-trayal. In such novels as "The Comforters," "Memento Mori" and "The Prime of Miss Jean Brodie," this narrative strategy has yielded some deliciously funny metaphysical humor as well as some clever satire; and there are moments in these stories when the same qualities snap, instantly, into focus.

Spark's portraits of the English and Dutch in Africa capture, with Waugh-like acerbity, the pretensions and hypocrisies of the colonial Third World, and her depiction of the psychological games that develop within close munities of people — a colony of expatriates, a trio of former schoolmates, a group of tenants in a rooming house - possesses a similar

venomous vigor.
Still, one often suspects that Spark does not care a lot for her characters, and this chilliness is accentuated in her shorter fiction. With the exception of "The Go-Away Bird" —a longish story that beautifully delineates the inexorable patterns of fate in an African girl's life - these stories have a spindly, bony quality; they fold up on themselves like collapsible chairs, with-

Solution to Previous Puzzle

out giving us any sense of their people's inner lives, their histories or their hopes and motivations. Irony is all in these stories — both the payoff and the raison d'être. "The Fathers "Daughters," for instance, is an altogether predictable tale about a literary fortune hunter who dumps the daughter of one famous man who dumps the daughter of one famous man for the daughter of another. "The First Year of My Life" is a slight, silly piece predicated on the control that babies are born omniscient infants, Spark writes, "know everything that is going on everywhere in the world; they can tune in to any conversation they choose, switch on to any scene" — and lose this knowledge as they grow older. "The Black Madonna" is little more than a fancy illustration of the ald married

they grow older. "The Black Madonna" is little more than a fancy illustration of the old maxim that you'd better be careful about what you pray for because you might get what you want. In "The Black Madonna," a statue carved out of dark wood appears to grant the wishes of devout parishioness; a similar sense of the otherworldly intrudes in many of these stories. Even when the context is not overthy religious. Even when the context is not overtly religious, the implication remains that the supernatural exists, that commonplace lives are subject to mysteries that pass human understanding. A little flying saucer glides into a living room in "Miss Pinkerton's Apocalypse," and the heroine dispassionately notes that the saucer is Spode, and that it is being piloted by a man the Spode, and that it is being piloted by a man the size of her finger. A real angel with three pairs of wings and huge, luminous eyes pays a visit to a Christmas pageant in "The Seraph and the Zambesi," disrupting the local festivities. Evil incongruously embodied in the persons of two small children makes an unexpected appearance in "The Twins." Ghosts, also, figure prominently in several of the tales: in "The Executor" the restless spirit of a writer haunts Executor," the restless spirit of a writer haunts his dishonest niece; in "The Leaf-Sweeper," a madman who wants to deny the spirit of Christmas meets up with an apparition of his alter-ego; in "The Portobello Road," a murr, dered woman keeps tabs on the people respon-sible for her death.

As in Spark's novels, nasty, violent doings proliferate freely in these stories; People either live separately, "frolicking happily but not together," or collide precipitously with one another, getting tied up in complicated stratagems that come to bloody conclusions. A worthan nicknamed Needle is choked to death in a haystack after she vows to reveal an old friend's secret. A farmer returns from jail to find his wife with another man, and kills them both. In what may be a case of mistaken identity, a man shoots his would-be lover and then himself. Such endings may well ratify Spark's distinctly dark view of human nature
—an apparent belief in original sin, combined
with a conviction that people are better off living independent lives, free of messy entanglements — but the reader too often feels that the author has stacked the cards against her

Michiko Kakutani is on the staff of The New York Times.

#### Pius II Book Found in Ohio

United Press Internation WARREN, Cino —An original edition of a book of letters by Pins II, pope from 1458 to 1464, has been discovered among a collection of old books in storage at a county library here. The 252-leaf incunabulum, titled "Epistolae Familiares," was printed by Johann Koelhoff in Cologne in 1478, only about 25 years after Johannes Gutenberg invented the first printing cross.

#### Giants Eye Oakland, Get a Glare Back

SAN FRANCISCO (AP) - The owner of the San Francisco Grants, Bob Lurie, announced Wednesday he wants to move his baseball team to Oakland for the next few years while a new stadium is being built in downtown San Francisco, but while the plan was endorsed by San Francisco's mayor, Dianne Feinstein, Oakland's mayor, Lionel Wilson, responded that he does not want the club.

Wilson said that having the Giants play in Oakland would harm his city's chances of regaining the Los Angeles Raiders or of attracting another National Football League team. He also said that Lurie and Feinstein showed "awfully poor judgment" in announcing the plans before consulting with him or the board of Oakland's Alameda County

Feinstein, calling it "a last-ditch effort to keep the team here," said the lan called for Lurie to pay San Francisco "several million dollars" to yout his lease at Candlestick Park, the Giants' home since 1960. The lease expires in 1994 but, Lurie said, "The San Francisco Giants will not under my ownership, play at Candlestick Park beyond this season."

#### Lendl Out of Cup Singles Matches

FRANKFURT (AP) - Ivan Lendl, the world's top-ranked player said Thursday that because of an arm injury he was pulling out of Czechoslovakia's singles matches in its Davis Cup tennis semifinal

Lendl, the U.S. Open champion, said he would play only doubles, adding that "I've had problems with my right arm since Wimbledon." The team captain, Jan Kodes, nominated Tomas Smid and Miloslav

Mecir to play singles, with Lendl and Smid teaming up in doubles.

Mecir to play singles, with Lendl and Smid teaming up in doubles.

Mecir was drawn to play Wimbledon winner Boris Becker in the opening singles Friday, with Smid meeting Michael Westphal. The doubles are scheduled for Saturday and reverse singles for Sunday, when Becker meets Smid and Westphal plays Mecir. Becker and Andreas Maurer are to play doubles for West Germany, which defeated the United States, 3-2, in August to reach the semifinals.

#### FBI Report Implicated 5 Cowboys

NEW YORK (NYT) — The National Football League is looking into an allegation made in a 1982 FBI report that five members of the Dallas Cowboys agreed to shave points in games in exchange for cocaine in the early 1980s. At the same time, the FBI has begun investigating why its agents did not act on the allegation when it was first made.

The allegation was made in a memorandum written in December 1982 by a former FBI undercover agent in Miami who forwarded the report two months later to the bureau's office in Dallas. In his report, Daniel Authory Mitrione Jr., the agent, said that two Dallas-area men had told him that they had supplied cocaine to the Cowboys in exchange for shaving points in several games.

Jim Siano, the FBI supervisory agent in Dallas who received the memorandumn, said in an interview with The Miami News that he had filed the report without starting an investigation because he judged the information to be too vague. A spokesman for the NFL said it was "talking to the authorities to see what, if anything, they have." The NFL, he said, is conducting its own investigation "as we routinely do with

#### Pacific Conference Games Revived

CANBERRA, Australia (AP) — The endangered Pacific Conference Games have been given a new lease on life by a decision to convert them into a junior competition backed by a private promoter and based at the new Sports World Complex in Hawaii. A decision to conduct the games every two years, instead of every four,

was made Thursday at a meeting of the organizing federation in Canberra, where China was admitted as a sixth member, joining Australia, New Zealand, Canada, Japan and the United States.

The United States, which formally announced its withdrawal from the games six weeks ago, said it will continue to take part.

#### For the Record

Carter singled to center and the Mets led

George Foster opened the second inning with a short chop to third base that went for an uncontested single. Howard Johnson's single to center sent Foster to third. One out later, he scored when Gooden grounded to shortstop Ozzie Smith, who got the force out at second but not the

Andy Van Slyke led off the bottom of the second with a single to right. After Terry Pendleton flied out to left, Porter, hitting only .210, spiked a line drive into right-center and ran it into a triple. Van lyke scored, and it was 2-1.

In the fifth, the Mets eked out another run. Rafael Santana opened with a double to left-center. Gooden bunted toward the

But nobody was laughing when Keith whirled toward third, but the ball flew out Hernandez singled behind second, Gary of his hand for an error and both runners were safe. Santana scored while Mookie

Wilson was bouncing into a double play. In the seventh, Foster led off by whacking Andujar's first pitch over the left-field fence for his 21st home run of the season. In rapid order, Santana singled, Gooden bunted him to second, Wilson singled him home and Andujar was gone. Now the Cardinals trailed by 5-1, and their grip on

first place was looking very fragile, indeed. They gave it one last shot in the minth when Gooden got two outs but walked two batters. Vince Coleman, 0-for-19, singled to center to make it 5-2. Willie McGee singled behind second, where Santana and Backman collided. The bases were loaded.

Gooden got Herr to line to Backman on his 136th pitch of the game, then reflected: "I got out of my rhythm a little, but I thought I had great stuff."

#### **Dodgers Win NL West Title**

LOS ANGELES - The Los Aneles Dodgers became the first major league team to clinch a division title this season when the San Diego Padres, on Carmelo Martinez's tie-breaking home run in the eighth inning, beat the Cincinnati Reds, 5-

Wednesday night. That set off a celebration midway through the game in which the Dodgers beat the Atlanta Braves,

#### BASEBALL ROUNDUP

9-3, as Orel Hershiser won his 11th straight to run his record to 19-3. Mike Marshall homered and got three of the Dodgers' 17 hits, driving in three runs.

Martinez's homer in San Diego came on a 3-2 pitch by reliever Tom Hume after the Reds had overcome 3-0 and 4-2 leads.

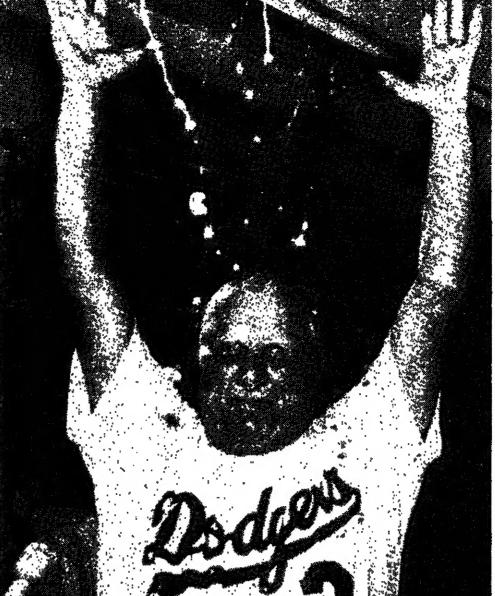

Astros 7, Giants 2: Jim Pankovits led off with a homer and Houston scored four times in the eighth to win in San Francisco.

Expos 3-2, Phillies 1-3: Tim Raines had two hits, stole three bases and scored twice in the first game in Montreal. In the second, Charles Hudson pitched a six-hitter and drove in a run as Philadel-phia ended an 11-game losing streak. Raines stole his 70th base in that game; he is the first major leaguer to reach that mark five years in a row.

Pirates 9, Cubs 4: Johnny Ray's three-run bomer in the sixth rallied Pittsburgh in Chicago.

Tigers 4, Blue Jays 2: In the American League, Darrell Evans became the first player to hit 40 home runs in both leagues as he helped beat Toronto in Detroit. Evans, 40, who hit 41 homers for the Atlanta Braves in 1973, also became the oldest AL player to hit 40.

Brewers 1, Yankees 0: Milwaukee rookie Teddy Higuera pitched a six-hitter in New York that ended hitter, but in the third inning he

### Angels Field Poorly, **Royals Tie for First**

By Ross Newhan

KANSAS CTTY, Missouri -There had been a feeling for several years it would come to this: a season in which no one would, or could, win the American League

The California Angels, a boring 36-35 since the All-Star break and losers of six of their last nine games, had a chance Wednesday night to take a two-game lead over the Kansas City Royals. A virtually insurmountable lead with four games to play. Champagne time.

They responded with an embarrassingly inept and unaggressive performance that helped create another tie for the division lead, the eighth in the last 14 days.

Bud Black, who had won only one of his last nine starts and pitched five innings or less in seven of them, held the Angels to three hits in a 4-0 victory. George Brett's three-run, inside-the-park home run in the first inning marred a strong performance by Ron Romanick, a victim of suspect out-

Thursday night, the Angels' Don Sutton will face the Royals' Danny Jackson in the series final. Then the Angels head to Texas for the final weekend of the regular season while the Royals remain home against Oakland, There have been so many ties; however, that it is as if a Monday playoff is preordained.

The Angels led this race by seven and one-half games on July 21. The Royals led by three on Sept. 14. It

their kids to be out late on school nights."

No one was out late Wednesday. Black needed only two hours and eight minutes to pitch his first shutout since May 21. A control spe-cialist who had been plagued by an inability to get his breaking pitches over, he struck out five, walked two and allowed only one runner to reach second.

"The way he was pitching," Mauch said, "we might have played a couple more hours without scoring. He picked a bad time to pitch one of his better games."

"I didn't make one bad pitch," Romanick said, "and I was down, 3-0. That's hard to take. I probably pitched my best game of the year after that first inning but Black did it for nine innings and I did it for seven. That was the difference."

In the first, the Royals' leadoff hitter, Lonnie Smith, looped a single to left-center, where Brian Downing approached the seeming-ly catchable fly with inexplicable

Smith stole second, and Romanick made a costly mistake, hitting Willie Wilson on a two-strike pitch. Brett hit a fast ball off the end of his bat, pulling a high fly down the right-field line.

Juan Beniquez, playing Brett straightaway, made a long run and frantic dive, but the ball bounced past him to the wall. Center fielder Gary Pettis raced to retrieve it, but Brett beat the relay. It was his 27th homer this year, the second insidethe-park homer of his career.

Romanick, with only one victory has become a race with no apparent in his last 10 starts, said his immeend, and very little interest. The diate reaction was that both the

### The Meanest Cut of All

By Russell Baker EW YORK — One day I am pruning hydrangeas the way Comstock, who understood flow-

ers, showed me years ago. Silliman walks by with his dog, looks over my shoulder. "That's not the way to prime a hydrangea," he says.
"I learned it from Comstock,

who understood flowers," say I, and Silliman laughs and laughs. Don't ever tell anybody you actuflowers," says Silliman, "Every-body knows Comstock was a flow-

It's always been like this.

Years ago, maybe 1954 or so, stereo sound is all the rage, so I buy a stereo. "The best, I want the best," I tell the salesman. He sells me a Hochmeister. I invite Frettick over to hear it play my Harry Bela-fonte record. Frettick comes over. I have the Belafonte record in hand and am thinking, "Eat your heart out. Frettick," as he stares at my

"A Hochmeister?" Frettick looks puzzled, "Couldn't you afford a quality machine?

It's been like that all my life.

Basically, this is why I quit going to barbers. The first barber I remember was Roy. When we moved to another town I went to a barber named Nick. "Who has been cutting your hair?" asked Nick. Roy," I said. "Why do you ask?" "They ought to take away his barber's license," Nick said.

We moved to another town where the barber was just plain Bill. Whoever has been cutting your hair has made an awful mess of it."

just plain Bill said. We kept moving. Fortunately, every new town had a wonderful new barber to rehabilitate the disaster that the false barber had made on my head in the last town. Inferior haircuts, Inferior stereo systems. Inferior flower pruning. I

am telling the story of my life.

I go to the dentist — this is a long time ago - with a toothache. He looks in my mouth. "What tooth butcher made this mess in your

"Nobody," I say. "I have not been to a dentist in 34 years because I always expected to die at the age of 33 and did not want to waste my limited time undergoing maintenance and repair."

mess," says the dentist, powerless to abandon his prepared speech and improvise. This jaw needs to be stabilized."

my jaw, thoroughly stabilized. moves with me to another town where a barber named Jimmy starts repairing the damage done by my previous barber. Naturally I need a new dentist. After examining my teeth, the new man removes his eyeglasses, sits down and bursts

"I ween at the thought that a fellow dentist is capable of work so disgraceful as this," he says.

It's been like that all my life, and always will be. I guess.
I have my house painted and the painter, before starting, always shakes his head and says, "Whoev-er painted your house last time didn't know what he was doing, did

I take the car to a new shop. The mechanic says the old shop put in a new battery when it should have put in a new carburetor, and as a result I now need six fresh pistons and two new tires.

Whatever the last painter, mechanic, dentist, barber, roofer, fur-nace cleaner, floor sander, pants presser, pruning instructor, gadget salesman or fashion adviser painted, repaired, bridged, clipped, shingled, cleaned, sanded, pressed, taught me, sold me or advised me - whatever it was - it was all wrong, a total mess, a swindle, a disaster, a shoddy piece of business, the full catastrophe.

I have become too discouraged to do anything about the ruin into which my life is falling. I sit home refusing to notice the roof is leaking. I am too busy worrying that I might suddenly need surgery. I cannot bear to think of the surgical aftermath when, having moved to another town and needing surgery again, I am anesthetized and beeled again into an operating room. The surgeon makes a stroke with his scalpel, peeks inside, re-coils in horror and shakes me vigor-

"Wake up!" he cries. I obey. "Whoever did your last operation." he says, "ought to have his plumber's license revoked."

New York Times Service

## Susan Rothenberg: Wrestling With the Spirits

By Paul Richard

WASHINGTON — You Would not guess it from her golden laugh or from her straight-on, streetwise moxie, but Susan Rothenberg, the painter, knows how to summon spirits. Her pic-

tures give no peace.

Shades and visitations, sensed but not quite seen, lurk like nervous muggers in the shadows of her art. She calls them "the unnameable." One can feel their restless writhing in the fidget of her brush strokes. Dark subsurface powers agitate her paintings the way Manhattan's subways shake the city's streets.

Fourteen of her oils and two of her new drawings are on view at the Phillips Collection here until Nov. 17. Among the small and sweetly colored School of Paris paintings in that intimate muse-um, Rothenberg's big pictures seem monumentally New Yor-kish. She was born in Bulfalo in 1945, studied at Cornell and dropped out in the 1960s to hang around in Greece, but is now in many ways fastened to Manhattan. One feels its weight in her coiled energy, and in the cut-theguff quickness of her talk. And with her paintings now selling for more than \$50,000 she is among the hottest younger painters in

She headed for Manhattan at the end of the 1960s, and started hanging out with sculptors and performers, dancers and musi-cians. Few of her friends were painting, but Rothenberg kept at t. Then suddenly she hit.

that art-infested town

She was 31, and struggling for cash, when no less than William Rubin, the imperious guiding spirit of the Museum of Modern Art, came thumping up the broken stairs of her downtown stu-"It was the shock of shocks, the honor of honors," she says. "He pointed his cane at three of my paintings and said, 'Have them brought to my museum.' She was not a master then. She is not a master yet, but her art is dense with promise, and its strength is unmistakable - and the New York art world's scouts do not have time to waste.

Rothenberg herself will not rush. She spends most of her studio time "sitting in a chair, looking at the painting." She says her

method is "corrective." "I make a outline, sometimes head-on, or in packs and then retreat, and wait, and wait some more. And then I make another. It's all very mysterious. And gradual. You sort of sneak up on the picture and get

one piece at a time."
The postwar Action Painters of the New York School, who seemed to dredge their subjects from their souls, made their picnires quickly. But Rothenberg is patient. "A painting needs something else," she says, "something from another state of reality."

The image of a horse was the first of many ghostly shades to show up in her art. For seven years it reappeared in painting after painting, sometimes in dark

in vogue, and Rothenberg was painting wholly abstract pictures "the rule was keep-it-flat" when suddenly the animal began to stamp its shape on the flatness of her fields. Rothenberg can not in 1944 - was completely unextell you whether that strange heast was the dark horse of the nightmare, or the grand steed of studio, feeling frustrated and the heroes, or the sweet colt of the

spring or all of these or none. Her horse pictures astonished. (Rubin purchased one of them.) They seemed to contradict them-- and to prophesy the future. Half-depictive, half-abstract, half-fleshy and half-flat. they tied the restrained cool of

PARIS & SUBURBS

web of golden light. "He was so severe," says Rothenberg. "I want him to have fun." In "Mondrian Dancing" (1984-85) he is doing the boogie-woogie in a Harlem nightclub. It is said that shades abhor the sun, but Mondrian's enjoys it. In "ING-Spray" (that's pig Latin for Spring) he is stand-ing in the midst of a freshly plowed Long Island potato field his glasses shoved back on his head. He is drinking in the sun.

The light that warms his neck is a peculiar vivid orange. Beyond the dark plowed earth, beyond that orange sunlight, the land-scape turns to green. "Mondrian hated green," says Rothenberg, "but I thought I ought to tease him. I used this ghastly green. But then — in fear — I fell back into black and white."

of a sudden, there were the glasses and that white nose and a little

Why Mondrian? Much as she

that he has been embraced by a

Though Rothenberg will tell you that she is "totally afraid of lear," one fear rules her painting. She is afraid of color.

It is that apprehension that chains her pictures to Manhattan
— and makes them feel so alien amidst the sunny, subtly colored French pictures at the Phillips Much advanced Manhattan art is ferocious black-and-white. Think of Franz Kline's blacks, and Rothko's and Frank Stella's, and the grays of Jasper Johns. Even when Rothenberg turns away from strict black-and-white — to give her white dog's coat a sickly yellow sbeen ("Al With Bananas 1984), or to hint at sexual passion ("Red Blush" 1984-85), or to tease the ghost of Mondrian her colors are not colorful. "If the image is really loaded, color seems a cheap shot."

**PEOPLE** 

85,000 Hail Springsteen As 15-Month Tour Ends

Bruce Springsteen brought his "Born in the U.S.A." world tour #4. a nostalgic close before a crowd 85,000, in the Coliseum in Los Angeles. The four-hour concert, which ended a 15-month tour of four continents attracting about five million fans, opened, as usual, with the song "Born in the U.S.A." before a huge U.S. flag. Springsteen later recalled reciting the "Pledge of Allegiance" in grade school, saying he always thought the flag stood for fairness. "We've been all over the States," he said, "and I learned some things that gave me a lot of hope, and I learned some things that gave me a lot of hope, and I learned some things red that made me sad. I guess the these of America was not the one I feel of the out there often enough." Urgang the comment and another than the comment and th the crowd to donate time and money to local food banks, he noted, "If you cheer for it, you ought to do something about it, because this is your hometown."... The blues-man Memphis Slim, on a U.S. tour, said Americans may not appreciate this indigenous musical form but Europeans do, especially behind the Iron Curtain. "I think one reason we're made ashamed of the blues is because the blues came from the black people," Slim said in Anchorage, Alaska. The Europeans have more respect for it as an art." Slim, 70, who has lived in Paris since 1961, has toured Polynd Feet Character and Poments. land, East Germany and Romania.
"Behind the Iron Curtain I play in places like basebail parks and they'd be full," he said. "People t, c starving for blues. Those people have the blues anyway, you know."

The country music star Ricky for Skages will perform in Jordan Jan. 4, in Gailee Jan. 6, and in Jerusa-4, in Gaillee Jan. 6, and in Jerusalem Jan. 9, at the request of the ripgovernments of Israel and Jordan,
his record company, Epic Records,
said Wednesday. Skaggs, whose
hits include "Country Boy," em
"Heartbroke" and "Highway 40 cen
Blues," is a contender in an categorgid ries in the Country Music Association finals on Oct. 14.

Richard C. Hottelet, correspondent for CBS News at the United Nations for 25 years, is leaving the network to become public affairs counselor with the UN. Hottelet, 68, said he had taken early retirement and will assume his new duties at the end of October.
